Introduction

About the 2017-2018 report series

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI). The information presented is drawn from the 2016 Census of Canada and organized by province and RTS and RLS territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Quebec’s official language minority community.

Baseline Data Report Series

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region. A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix “B”.

Determinants of Health

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.¹

Language Barriers

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and impression formation which impacts the evaluation and treatment of individuals seeking health and social services.

Methodological Notes

Data Source

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2016 Census of Canada. The population included here are those in private householders, drawing on the long-form census which has a 25% sample of the Canadian population.

Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

Geographic Regions

The 2017-2018 Baseline Data Report consists of a series of stand-alone documents which present key data for the RTS and RLS territories in Quebec in which there are at least 250 English-speaking residents.

In 2015, as part of the re-organization of health services by the MSSS, a series of new health territories known as the RTS (réseau territorial de services) and the RLS (réseau local de service) were established.²

The RTS is the réseau territorial des services which corresponds to the territories covered by the CISSS and CIUSSS bodies that were created recently by the government.

The 25 RTS regions were based on the former RSS (région socio-sanitaire or health regions) territories with these important changes:

- The RSS Gaspésie - Îles-de-la-Madeline was divided into RTS de la Gaspésie and RTS des Îles-de-la-Madeleine.
- The RSS Montréal was divided into five RTS regions.
- Part of the former RSS Montérégie territory was assigned to the Estrie region, newly named as RTS Estrie et Centre universitaire de Sherbrooke.
- The remaining area for RSS Montérégie was divided into three RTS territories.

As part of the 2015 re-organization, the territories of the former CSSS (Centre de santé et de services sociaux) were transformed into 96 RLS territories and many were re-named.

It is useful to note that many RLS territories are identical to CLSC territories while others are comprised of multiple CLSC territories.

The 166 CLSC territories remained unchanged although some were re-named.

² Appendix A of this document provides tables which set out the population and hierarchy of the new health geographic areas for a given RSS and its RTS and RLS territories.

Demographic and Socio-economic Characteristics

The demographic and socio-economic variables addressed in the 2017-2018 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)
- Educational attainment
- Labour force activity

Statistics Canada Definitions

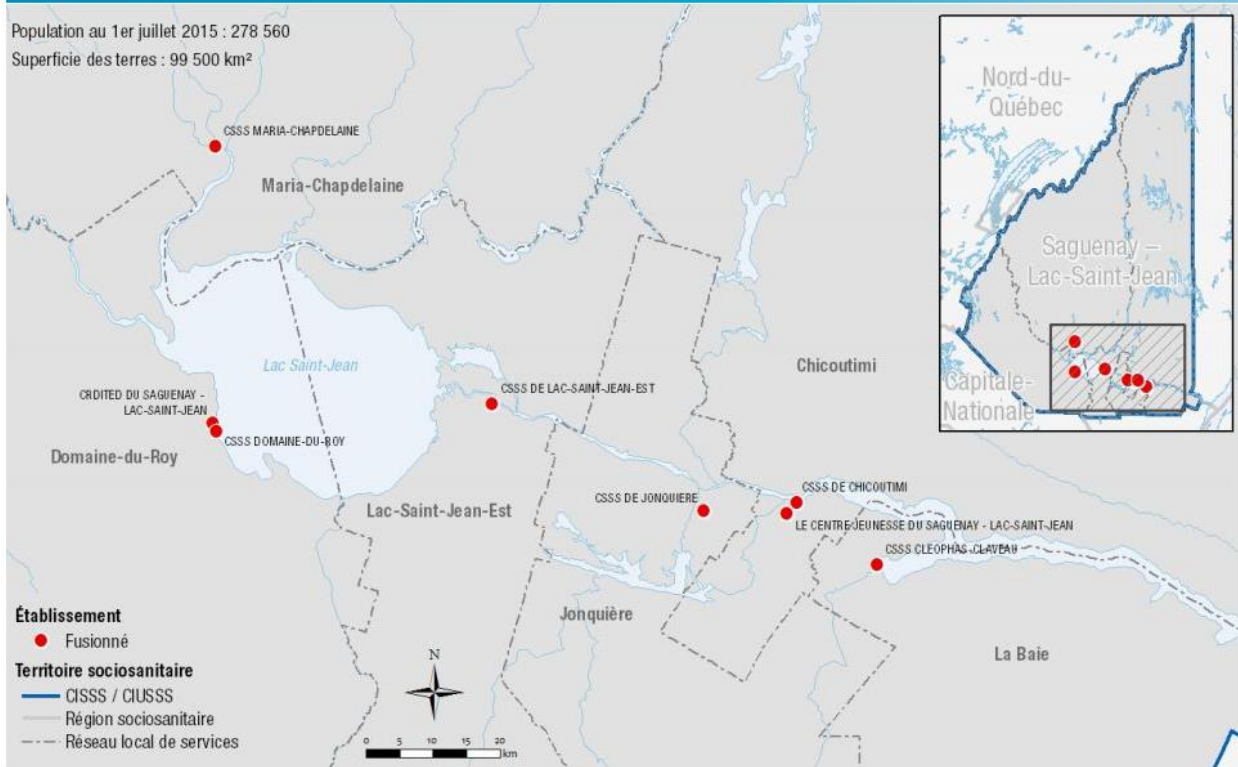

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2016 Census may also be consulted.

Demographic Size

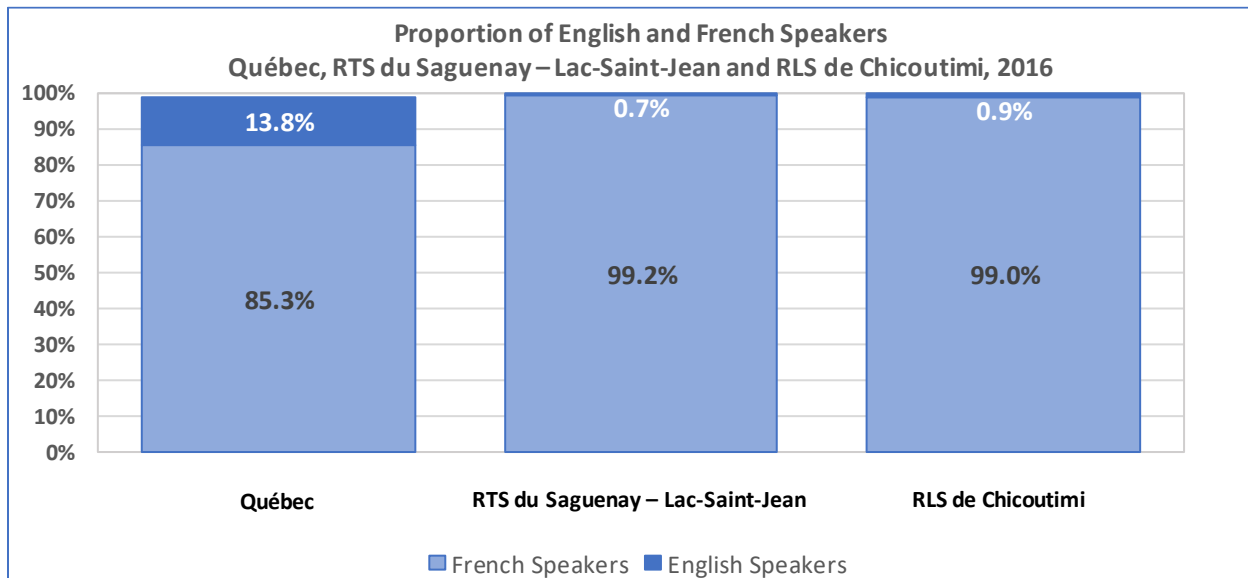

Quebec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.³ In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

Size of Population		Québec	RTS du Saguenay – Lac-Saint-Jean	RLS de Chicoutimi
FOLS - English speakers	number	1,097,925	1,975	710
	percentage	13.8%	0.7%	0.9%
FOLS - French speakers	number	6,795,280	266,835	75,760
	percentage	85.3%	99.2%	99.0%
Total population	number	7,965,450	268,870	76,505
	percentage	100.0%	100.0%	100.0%

(2006). “The Need for More Research on Language Barriers in Health Care: A Proposed Research Agenda”. *The Millbank Quarterly*, Vol. 84, No. 1, pp. 111-133.

- Across Québec, there were 1,097,925 English speakers, representing 13.8% of the provincial population.
- In 2016, there were 1,975 English speakers living in the RTS du Saguenay – Lac-Saint-Jean region where they represented 0.7% of the population. This share is much lower than the overall provincial share for English speakers.
- In RLS de Chicoutimi, we find 710 English speakers where they represented 0.9% of the population. This proportion is much higher than that represented by English speakers across the RTS du Saguenay – Lac-Saint-Jean territory.

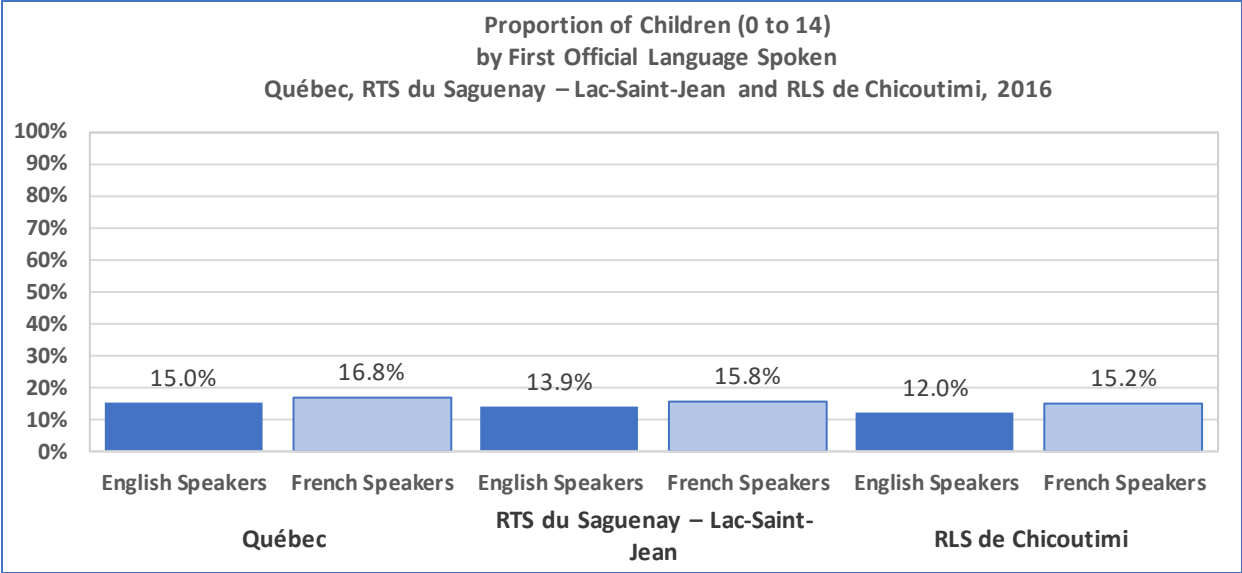

Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires awareness of the problems that are pressing for the minority and may be overlooked in the focus on the majority, and, awareness of problems that are shared by both language groups but are being met with solutions that are not equally accessible for both.

Table 2 - Age Structure of the Population

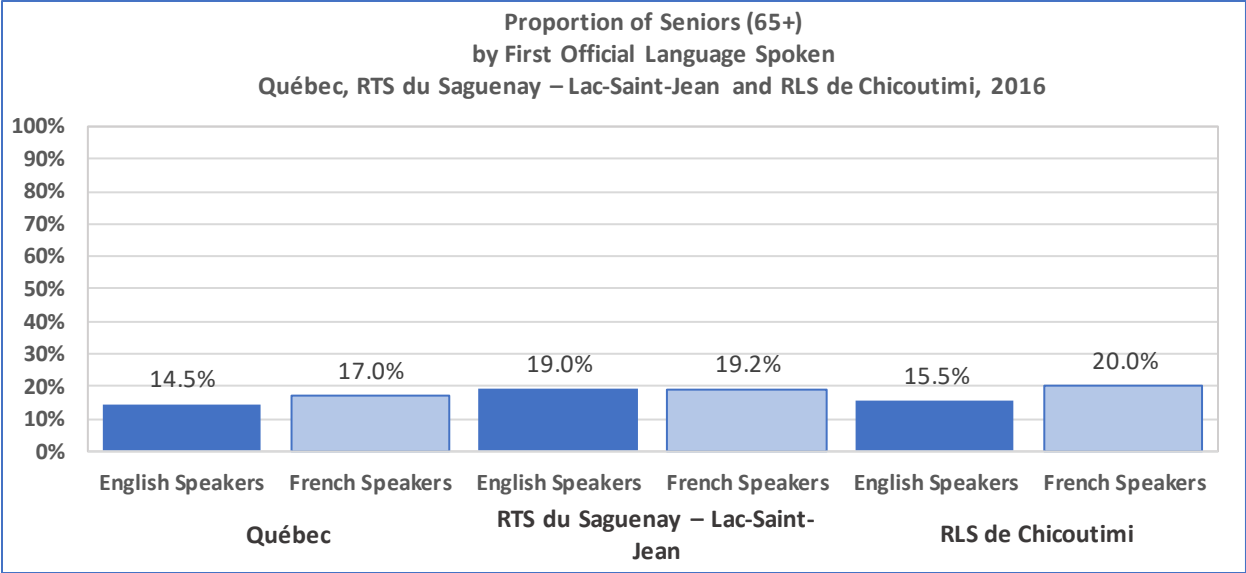

Age Structure of the Population	Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French
Total - Age groups	1,097,925	6,795,280	1,975	266,835	710	75,760
0-14 years	165,085	1,143,060	275	42,195	85	11,530
15-24 years	146,460	776,310	210	28,115	95	8,280
25-44 years	320,930	1,728,440	695	61,280	275	17,795
45-64 years	305,775	1,995,460	415	83,980	140	23,015
65+ years	159,670	1,152,005	375	51,270	110	15,135
Total - Age groups	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
0-14 years	15.0%	16.8%	13.9%	15.8%	12.0%	15.2%
15-24 years	13.3%	11.4%	10.6%	10.5%	13.4%	10.9%
25-44 years	29.2%	25.4%	35.2%	23.0%	38.7%	23.5%
45-64 years	27.9%	29.4%	21.0%	31.5%	19.7%	30.4%
65+ years	14.5%	17.0%	19.0%	19.2%	15.5%	20.0%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

Children (aged 0-14)

- Across Québec, there were 165,085 English-speaking children aged 0-14, representing 15.0% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 275 English-speaking children aged 0-14 living in RTS du Saguenay – Lac-Saint-Jean where they account for 13.9% of the population. The proportion of children in the regional English-speaking population is lower than their proportion in the regional French-speaking majority population. This proportion is lower than the level for English-speaking children across the province.
- In RLS de Chicoutimi, we find 85 English-speaking children aged 0-14 where they represent 12.0% of the population. This share is lower than that exhibited by English-speaking children across the RTS du Saguenay – Lac-Saint-Jean region. The proportion of children in the territory's English-speaking population is much lower than the share in the rest of Québec's French-speaking majority population.

Seniors (aged 65 and over)

- Across Québec, there were 159,670 English-speaking seniors aged 65+ representing 14.5% of the English-speaking population. The proportion of seniors in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 375 English-speaking seniors aged 65+ living in the RTS du Saguenay – Lac-Saint-Jean region where they accounted for 19.0% of the population. This share is much higher than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is similar to their proportion in the French-speaking majority population.
- In RLS de Chicoutimi, we find 110 English-speaking seniors aged 65+ where they account for 15.5% of the population. This share is much lower than that of English-speaking seniors across the RTS du Saguenay – Lac-Saint-Jean region. The proportion of seniors in the English-speaking population is lower than the proportion in the French-speaking majority population in the rest of Québec.

Income

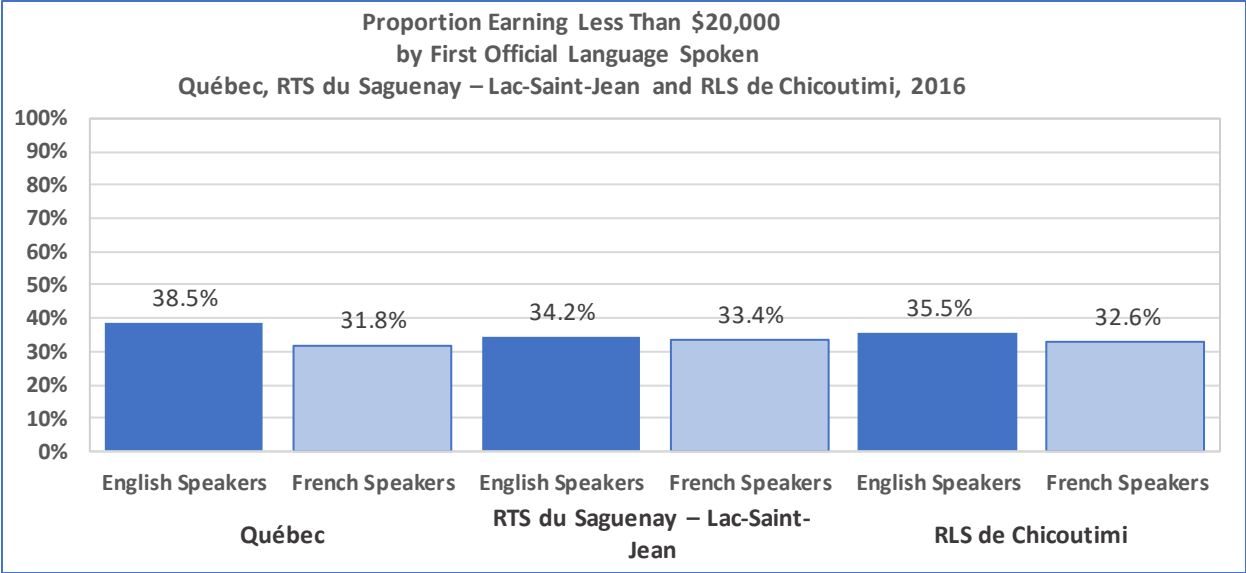

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.⁴ For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution lead to increases in social problems and poorer health among the population as a whole⁵.

Table 3 - Income

Population by Income Group	Québec		RTS du Saguenay – Lac- Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French
Total Population 15+	932,835	5,652,215	1,695	224,645	620	64,225
Less than \$20,000	359,020	1,799,170	580	75,010	220	20,965
\$20,000 - \$49,999	328,605	2,235,010	585	90,695	225	25,350
\$50,000 +	245,210	1,618,025	540	58,925	180	17,910
Total Population 15+	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Less than \$20,000	38.5%	31.8%	34.2%	33.4%	35.5%	32.6%
\$20,000 - \$49,999	35.2%	39.5%	34.5%	40.4%	36.3%	39.5%
\$50,000 +	26.3%	28.6%	31.9%	26.2%	29.0%	27.9%

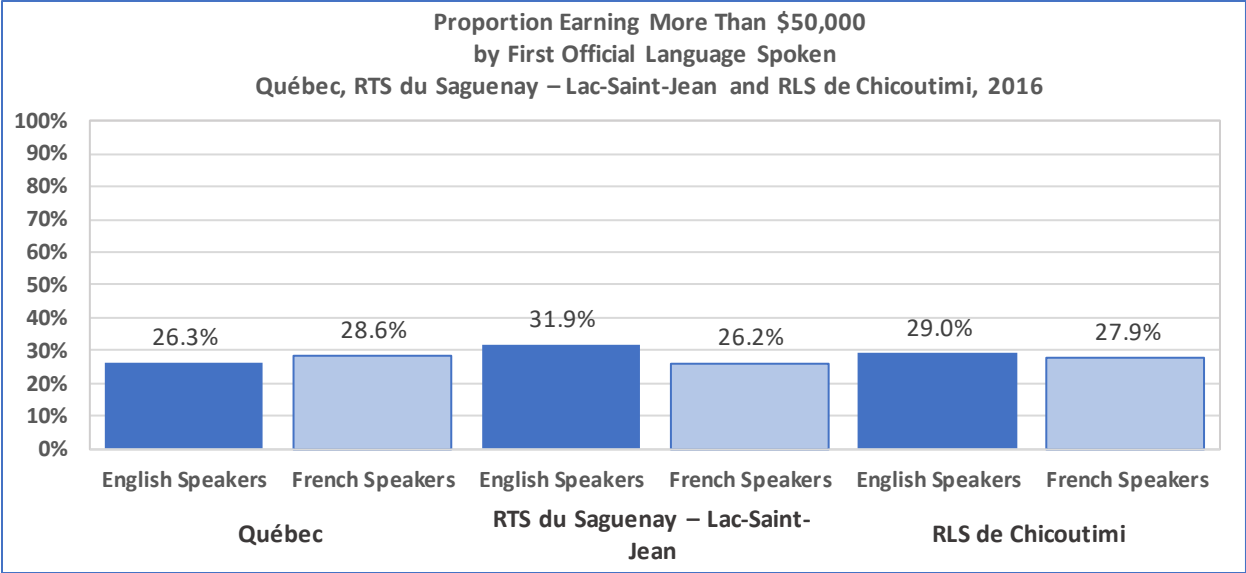

⁴ Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> Accessed March 2014.

⁵ *Ibid.*

Income under \$20k

- Across Québec in 2016, there were 359,020 English speakers aged 15+ with income under \$20k. This group represents 38.5% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2016, there were 580 English speakers aged 15+ with income under \$20k in the RTS du Saguenay – Lac-Saint-Jean region where they represent 34.2% of the English-speaking population aged 15 and over. This share is lower than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is similar to the proportion in the French-speaking majority population.
- In RLS de Chicoutimi, we find 220 English speakers aged 15+ with income under \$20k where they account for 35.5% of the population. This share is similar to that experienced by English speakers across RTS du Saguenay – Lac-Saint-Jean. The proportion of those with income under \$20k in the territory's English-speaking population is higher than the proportion for the French-speaking majority population in RLS de Chicoutimi.

Earning \$50k and over

- Across Québec, there were 245,210 English speakers aged 15+ with income over \$50k, who represented 26.3% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 540 English speakers aged 15+ with income over \$50k living in the RTS du Saguenay – Lac-Saint-Jean region, where they represented 31.9% of the population. This proportion was much higher than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is much higher than the share of high earners in the French-speaking majority population in the region.
- In RLS de Chicoutimi, we find 180 English-speaking high earners aged 15+, where they represent 29.0% of the population. This share is lower than that experienced by English-speaking high earners across the RTS du Saguenay – Lac-Saint-Jean region. The proportion of high earners in the territory's English-speaking population is similar to the proportion of high earners in the territory's French-speaking majority population.

Household Living Arrangements

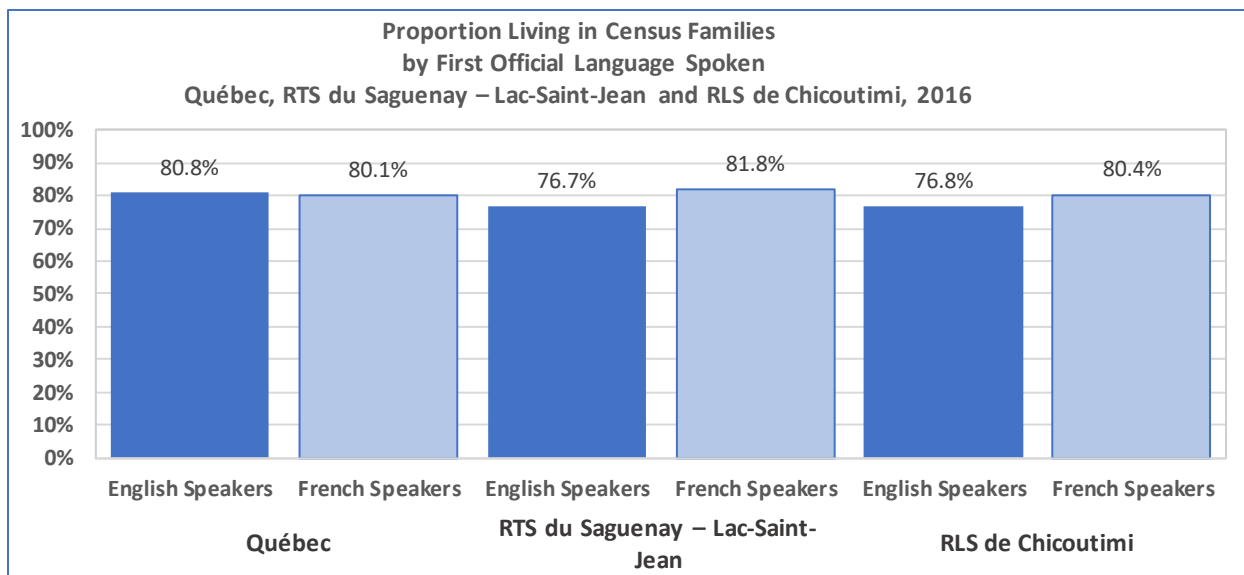

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. For example, the Quebec Social and Health Survey (1998) revealed that parents of minors living in lone parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.⁶ Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to illness or aging.

Table 4 - Population by Household Living Arrangements

Population by Household Living Arrangements	Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French
Total - Household living arrangements	1,097,925	6,795,280	1,975	266,835	710	75,760
Total persons in census family households	886,705	5,443,560	1,515	218,180	545	60,880
Persons in two-parent households	750,650	4,640,895	1,330	191,570	490	53,310
Persons in single-parent households	136,050	802,660	185	26,605	55	7,570
Total persons in non-census family households	211,215	1,351,720	460	48,655	165	14,885
Living with non-relatives only	40,935	213,270	120	5,660	60	2,030
Living alone	146,855	1,021,795	320	39,060	95	11,665
Total - Household living arrangements	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Total persons in census family households	80.8%	80.1%	76.7%	81.8%	76.8%	80.4%
Persons in two-parent households	68.4%	68.3%	67.3%	71.8%	69.0%	70.4%
Persons in single-parent households	12.4%	11.8%	9.4%	10.0%	7.7%	10.0%
Total persons in non-census family households	19.2%	19.9%	23.3%	18.2%	23.2%	19.6%
Living with non-relatives only	3.7%	3.1%	6.1%	2.1%	8.5%	2.7%
Living alone	13.4%	15.0%	16.2%	14.6%	13.4%	15.4%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

Living in census families⁷

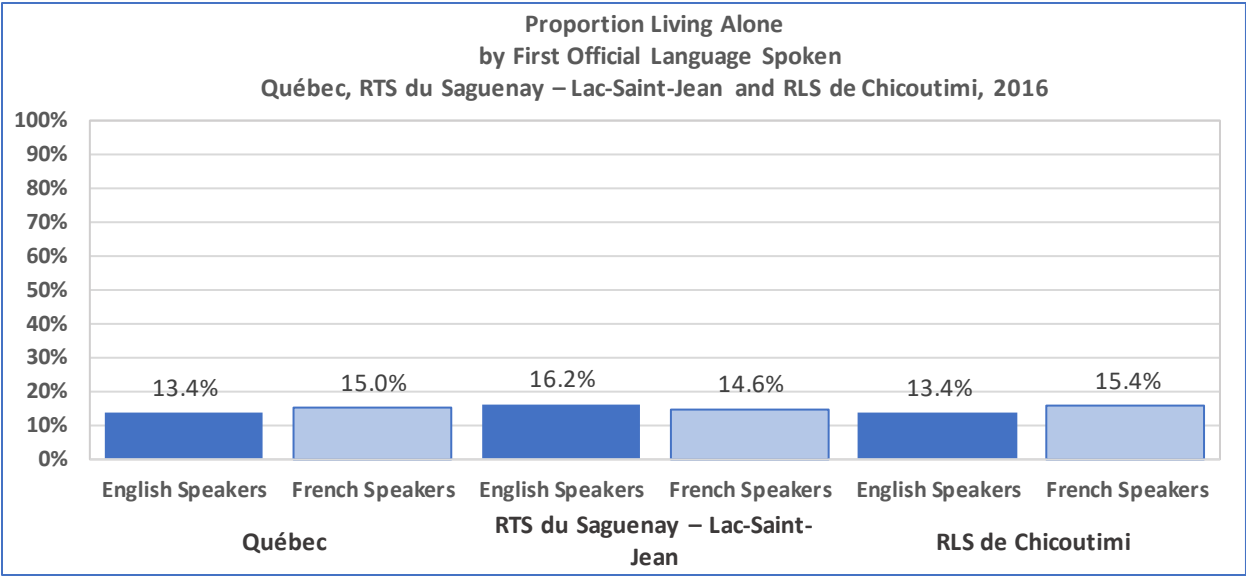

- Across Québec, there were 886,705 English speakers living in census family households. This group represents 80.8% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2016, there were 1,515 English speakers living in census family households in the RTS du Saguenay – Lac-Saint-Jean region where they comprise 76.7% of the population. This share is lower than that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population.
- In RLS de Chicoutimi, we find 545 English speakers living in census family households where they account for 76.8% of the population. This share is similar to that accounted for by English speakers across the RTS du Saguenay – Lac-Saint-Jean region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in RLS de Chicoutimi.

⁷ Under Statistics Canada's terminology, a census family refers "a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child. A couple may be of opposite sex or same sex. 'Children' in a census family include grandchildren living with their grandparent(s) but with no parents present." (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

Living in lone-parent families

- Across Québec, there were 136,050 English speakers living in lone-parent families. This group represents 12.4% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Quebec.
- In 2016, there were 185 English speakers living in lone-parent families in the RTS du Saguenay – Lac-Saint-Jean region where they account for 9.4% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population. The proportion is much lower than that found in the provincial English-speaking population.
- In RLS de Chicoutimi, we find 55 English speakers living in lone-parent families where they represent 7.7% of the population. This is lower than the proportion represented by the French-speaking majority population in RLS de Chicoutimi. The proportion of English speakers living in lone-parent families in the rest of Québec English-speaking population is much lower than the proportion we find for English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Living alone

- Across Québec, there were 146,855 English speakers living alone. This group represents 13.4% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 320 English speakers living alone in the RTS du Saguenay – Lac-Saint-Jean region, where they account for 16.2% of the population. This level is much higher than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is higher than the proportion found in the regional French-speaking majority population.
- In RLS de Chicoutimi we find 95 English speakers living alone, where they represent 13.4% of the population. This share is lower than that exhibited by English speakers across the RTS du Saguenay – Lac-Saint-Jean region. The proportion of those living alone in the territory's English-speaking population is lower than the proportion exhibited by the French-speaking majority population in RLS de Chicoutimi.

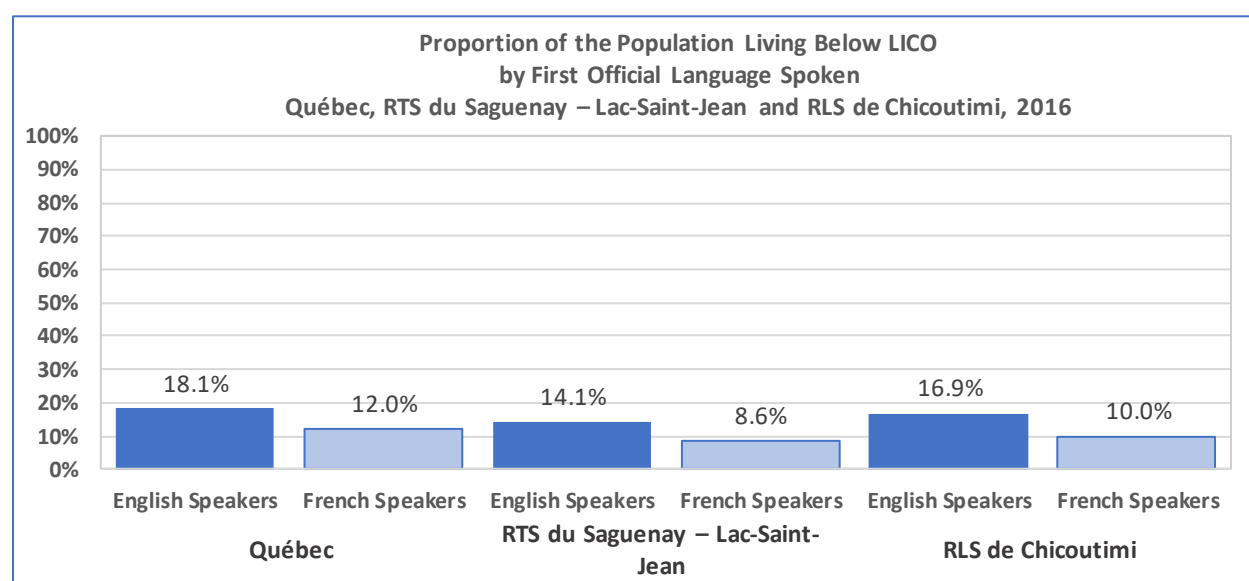

Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”⁸ The following table considers the population living below LICO by language, administrative territory and age group.

Table 5 - Population Living Below LICO, Within Age Groups

Population Living Below the Low-Income Cut-off (LICO), Across Age Groups	Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French
Total - Age groups	195,300	811,110	275	22,685	120	7,575
15-24 years	35,280	118,175	60	2,955	35	1,200
25-44 years	60,205	193,170	90	4,615	50	1,520
65+ years	25,445	152,425	40	4,825	25	1,820
Proportion of those below LICO across age groups						
Total - Age groups	17.8%	11.9%	13.9%	8.5%	16.9%	10.0%
15-24 years	24.1%	15.2%	28.6%	10.5%	36.8%	14.5%
25-44 years	18.8%	11.2%	12.9%	7.5%	18.2%	8.5%
65+ years	15.9%	13.2%	10.7%	9.4%	22.7%	12.0%

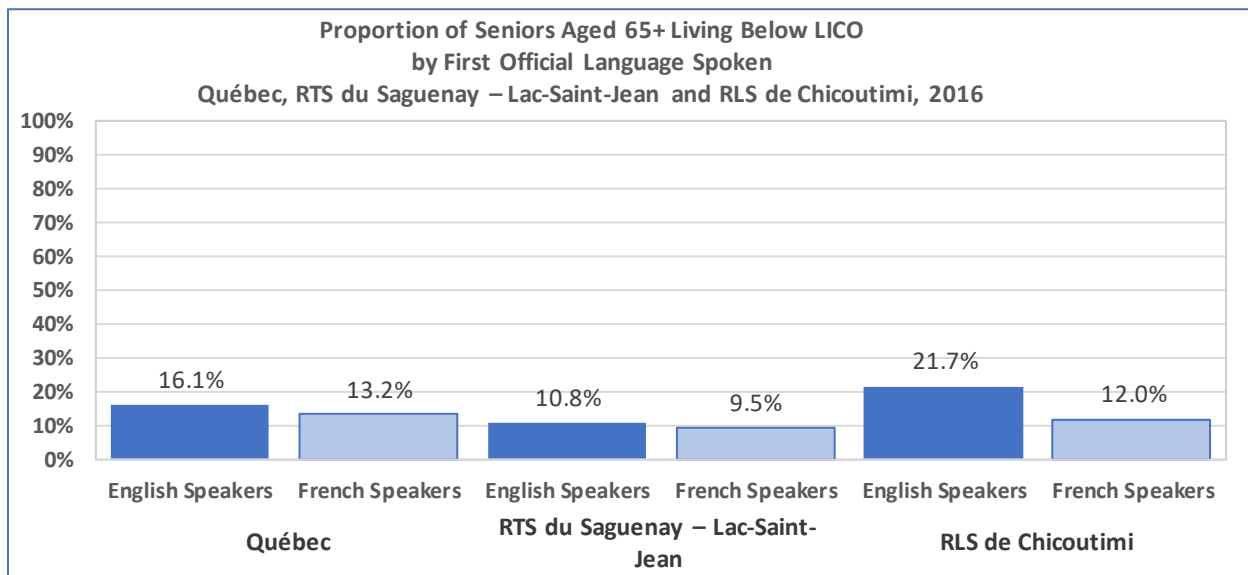

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.

⁸ See “Low income cut-offs” (dated 2015-11-2) <https://www.statcan.gc.ca/pub/75f0002m/2012002/lico-sfr-eng.htm> for explanation of how LICOs are calculated.

Population living below the low-income cut-off (LICO)

- Across Québec, there were 195,300 English speakers living below LICO. This group accounts for 17.8% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Quebec.
- In 2016, there were 275 English speakers living below LICO in the RTS du Saguenay – Lac-Saint-Jean region, where they represent 13.9% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in RTS du Saguenay – Lac-Saint-Jean is much lower than the proportion for Quebec's English speakers in general.
- In RLS de Chicoutimi, we find 120 English speakers living below LICO, where they represent 16.9% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much higher than the proportion for English speakers across RTS du Saguenay – Lac-Saint-Jean.

Seniors (65+) Living below the low-income cut-off (LICO)

- Across Québec, there were 25,445 English-speaking seniors living below LICO. This group represents 15.9% of the English-speaking senior population. The proportion of English-speaking seniors living below LICO is much higher than the proportion of seniors living below LICO in the French-speaking majority population in Quebec.
- In 2016, there were 40 English-speaking seniors living below LICO in the RTS du Saguenay – Lac-Saint-Jean region where they account for 10.7% of the regional English-speaking senior population. The proportion of those seniors living below LICO in the regional

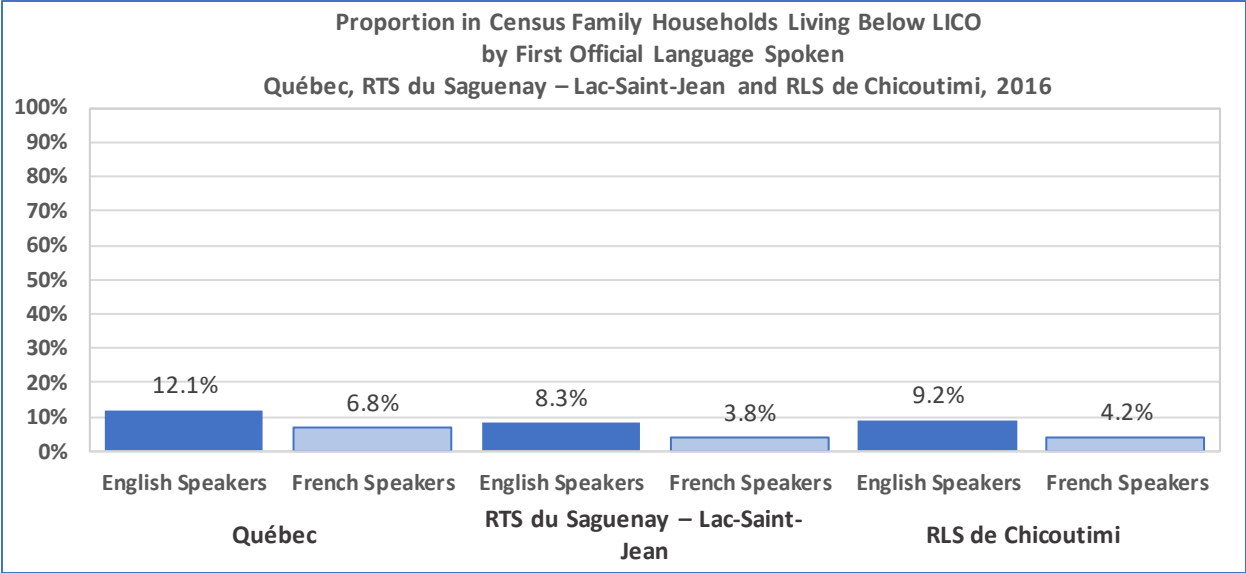

English-speaking senior population is higher than the proportion in the regional French-speaking majority senior population. This proportion is much lower than that experienced by English-speaking seniors across the province.

- In RLS de Chicoutimi, we find 25 English-speaking seniors living below LICO where they represent 22.7% of the English-speaking senior population. This is much higher than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much higher than the level displayed by English-speaking seniors across the RTS du Saguenay – Lac-Saint-Jean region.

Table 6 - Population Living Below LICO, by Household Living Arrangements

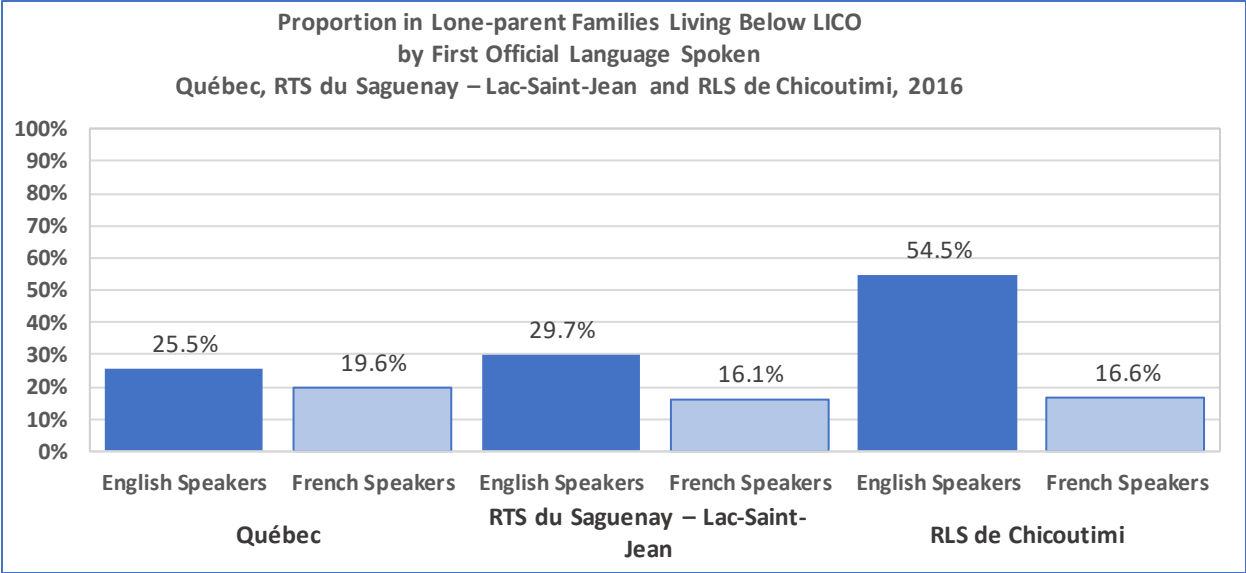

Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements	Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

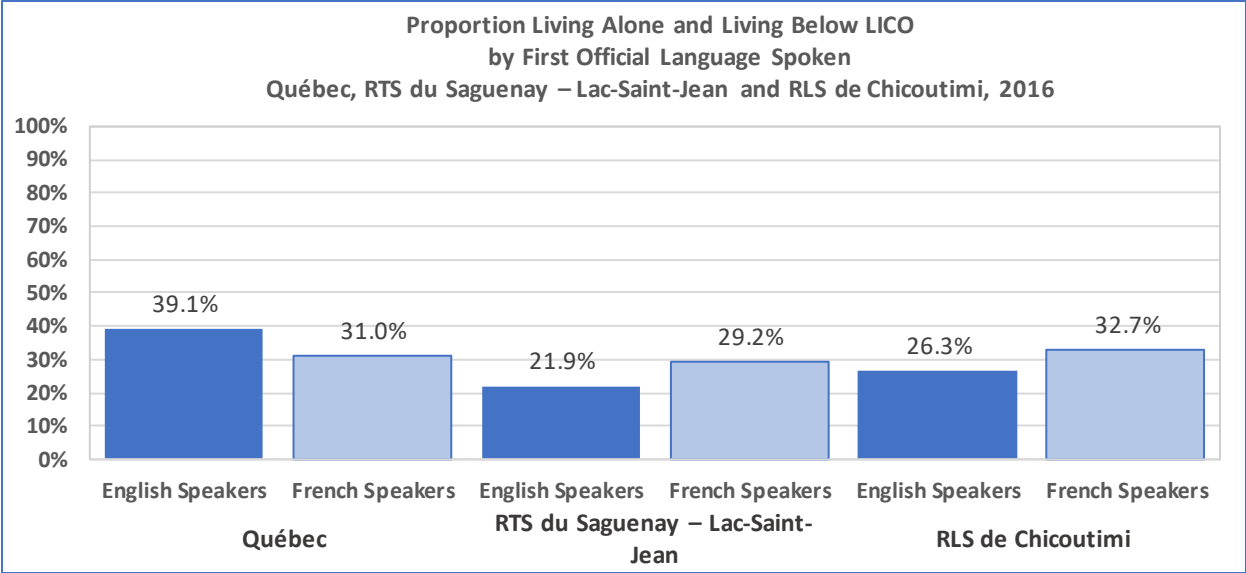

Persons in Census Family Households living below the low-income cut-off (LICO)

- Across Québec, there were 107,000 English-speaking persons in census family households living below LICO. This group represents 12.1% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.
- In 2016, there were 125 English-speaking persons in census family households living below LICO in the RTS du Saguenay – Lac-Saint-Jean region, where they represent 8.3% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is much lower than that found in the provincial English-speaking population.
- In RLS de Chicoutimi, we find 50 English-speaking persons in census family households living below LICO, where they account for 9.2% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is higher than the proportion found in the English-speaking population of the RTS du Saguenay – Lac-Saint-Jean region.

Persons in Lone-Parent Families Living below the low-income cut-off (LICO)

- Across Québec, there were 34,755 English-speaking persons in lone-parent families living below LICO. This group represents 25.5% of the English-speaking population living in lone-parent families. The proportion of English-speaking persons in lone-parent families living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living in lone parent families.
- In 2016, there were 55 English-speaking persons in lone-parent families living below LICO in the RTS du Saguenay – Lac-Saint-Jean where they account for 29.7% of the regional English-speaking lone-parent family population. The proportion of persons in lone-parent families living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The level for the English-speaking regional population is higher than that found in the provincial English-speaking population.
- In RLS de Jonquière, we find 20 English-speaking persons in lone-parent families living below LICO where they account for 22.2% of the English-speaking lone-parent family population. This is much higher than the proportion experienced by the French-speaking majority lone-parent family population in the same territory. The proportion of persons in lone-parent families living below LICO in the territory's English-speaking population is much lower than the proportion experienced by English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Persons living alone and living below the low-income cut-off (LICO)

- Across Québec, there were 57,435 English-speaking persons living alone and below LICO. This group represents 39.1% of the English-speaking population living alone. The proportion of English speaking persons living alone and below LICO is much higher than that found in the French-speaking majority population in Quebec living alone.
- In 2016, there were 70 English-speaking persons living alone and below LICO in the RTS du Saguenay – Lac-Saint-Jean region where they account for 21.9% of the regional English-speaking population living alone. The proportion of those persons living alone and below LICO in the regional English-speaking population is much lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that experienced by the provincial English-speaking population.
- In RLS de Chicoutimi, we find 25 English-speaking persons living alone and below LICO where they represent 26.3% of the English-speaking population living alone. This is lower than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is much higher than the proportion experienced by English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Highest Educational Attainment

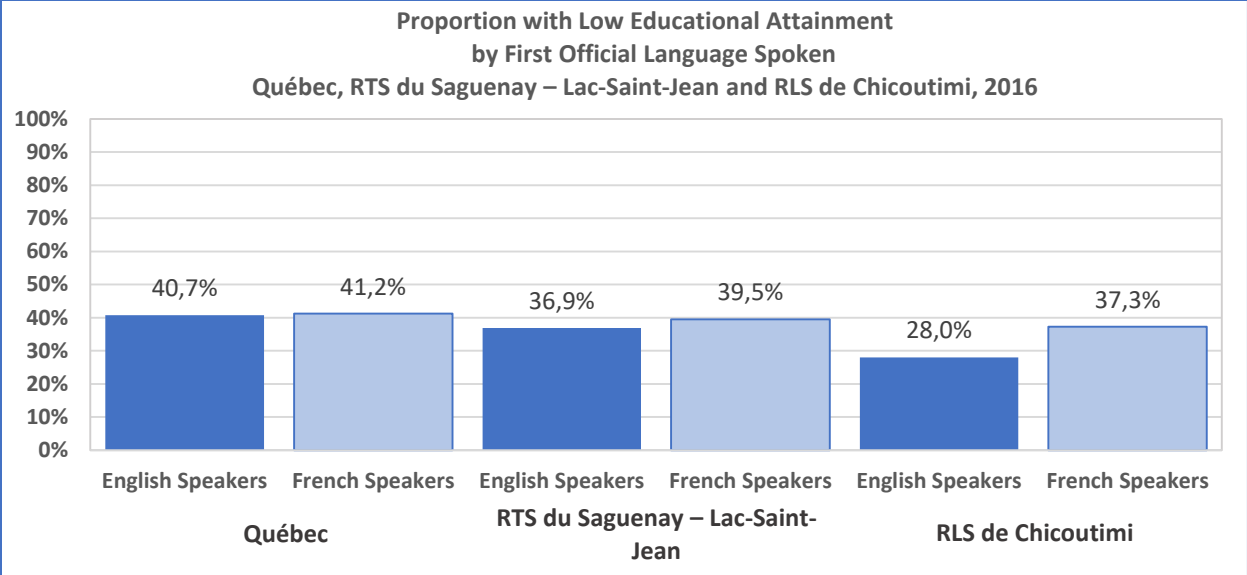

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members⁹.

Table 7 - Highest Educational Certification, for Selected Age Groups

Total Population by Highest Educational Certification		Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi

Population aged 15+, high school diploma or less

- Across Québec, there were 380,050 English speakers aged 15 and over with a high school diploma or less. This group accounts for 40.7% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Québec.
- In 2016, there were 625 English speakers aged 15 and over with a high school diploma or less in the RTS du Saguenay – Lac-Saint-Jean region where they account for 36.9% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is lower than that exhibited by English speakers across the province.
- In RLS de Chicoutimi, we find 175 English speakers aged 15 and over with a high school diploma or less where they represent 28.0% of the English-speaking population aged 15 and over. This level is much lower than the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is much lower than the proportion exhibited by the English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Population 25-44, high school diploma or less

- Across Québec, there were 84,680 English speakers aged 25-44 with a high school diploma or less. This group represents 26.4% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2016, there were 180 English speakers aged 25-44 with a high school diploma or less in the RTS du Saguenay – Lac-Saint-Jean region where they account for 25.9% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population in that age group. This proportion is similar to that exhibited by English speakers across the province in the same age cohort.
- In RLS de Chicoutimi, we find 35 English speakers aged 25-44 with a high school diploma or less where they comprise 12.5% of the English-speaking 25-44 cohort. This is much lower than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

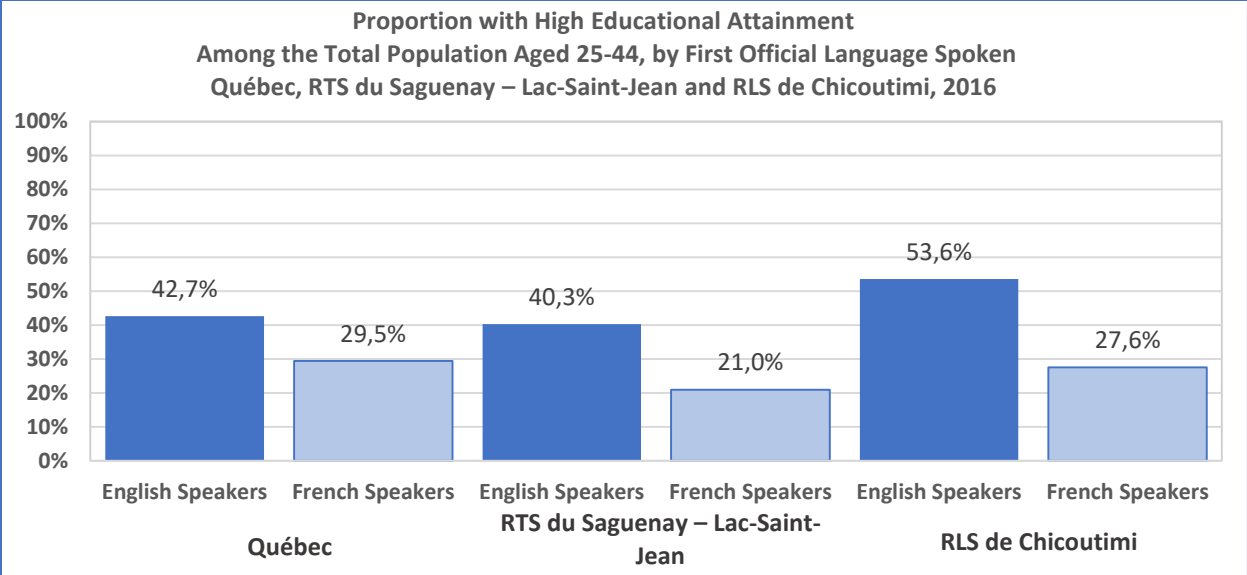

Population 45-64, high school diploma or less

- In Québec in 2016, there were 116,390 English-speaking aged 45-64 with a high school diploma or less. This group represents 38.1% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 140 English speakers aged 45-64 with a high school diploma or less in the RTS du Saguenay – Lac-Saint-Jean region where they account for 33.7% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the province's English speakers.
- In RLS de Chicoutimi, we find 40 English speakers aged 45-64 with a high school diploma or less where they comprise 27.6% of the English-speaking population. This is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the region.

Population aged 15+, university degree or higher

- In Québec in 2016, there were 275,800 English-speaking aged 15 and over with a university degree or higher. This group represents 29.6% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 490 English speakers aged 15 and over with a university degree or higher in the RTS du Saguenay – Lac-Saint-Jean region where they account for 28.9% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is similar to that exhibited by the province's English speakers.
- In RLS de Chicoutimi, we find 255 English speakers aged 15 and over with a university degree or higher where they represent 40.8% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

Population 25-44, university degree or higher

- In Québec in 2016, there were 136,960 English speakers aged 25-44 with a university degree or higher. This group accounts for 42.7% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 280 English speakers aged 25-44 with a university degree or higher in the RTS du Saguenay – Lac-Saint-Jean where they represent 40.3% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is lower than that exhibited by the province's English speakers.
- In RLS de Chicoutimi, we find 150 English speakers aged 25-44 with a university degree or higher where they comprise 53.6% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

Population 45-64, university degree or higher

- In Québec in 2016, there were 89,255 English speakers aged 45-64 with a university degree or higher. This group represents 29.2% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 115 English speakers aged 45-64 with a university degree or higher in the RTS du Saguenay – Lac-Saint-Jean region where they represent 27.7% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is lower than that exhibited by the province's English speakers.
- In RLS de Chicoutimi, we find 60 English speakers aged 45-64 with a university degree or higher where they comprise 41.4% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

Labour Force Activity

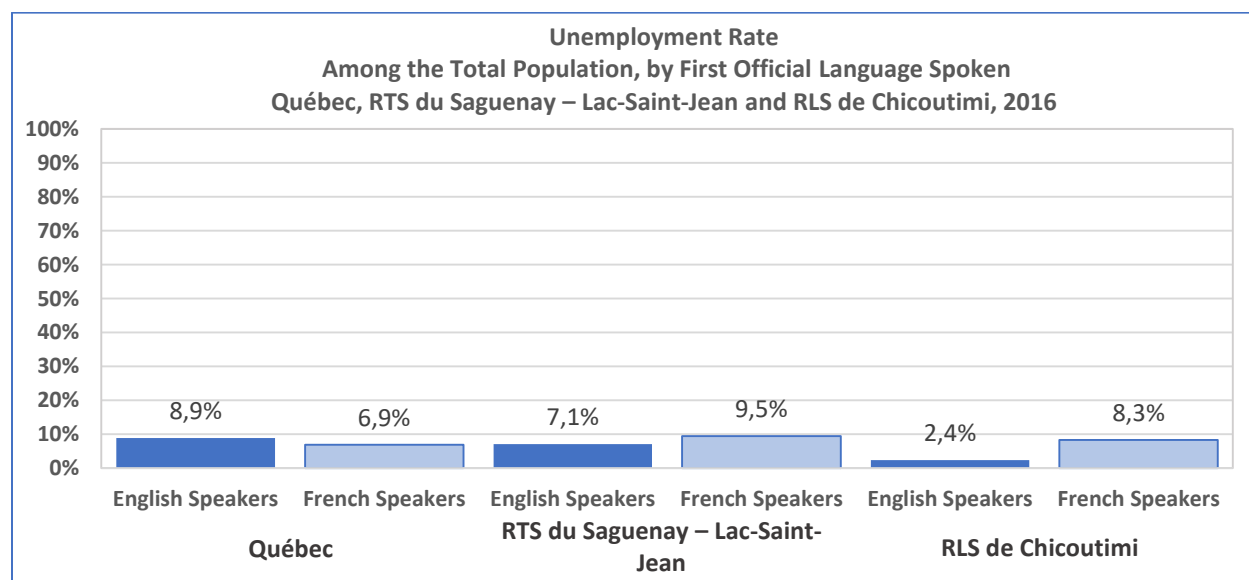

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.¹⁰

Table 8 - Labour Force Activity

Total Population by Labour Force Activity	Québec		RTS du Saguenay – Lac-Saint-Jean		RLS de Chicoutimi	
	English	French	English	French	English	French
Total - Labour force activity	932,840	5,652,215	1,695	224,640	625	64,230
In the labour force	608,050	3,636,980	1,055	132,425	410	38,170
Employed	553,945	3,386,575	970	119,905	400	34,995
Out of the labour force	324,790	2,015,230	645	92,215	210	26,060
Total - Labour force activity	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
In the labour force	65.2%	64.3%	62.2%	58.9%	65.6%	59.4%
Employed	91.1%	93.1%	91.9%	90.5%	97.6%	91.7%
Unemployed	8.9%	6.9%	7.1%	9.5%	2.4%	8.3%
Out of the labour force	34.8%	35.7%	38.1%	41.1%	33.6%	40.6%

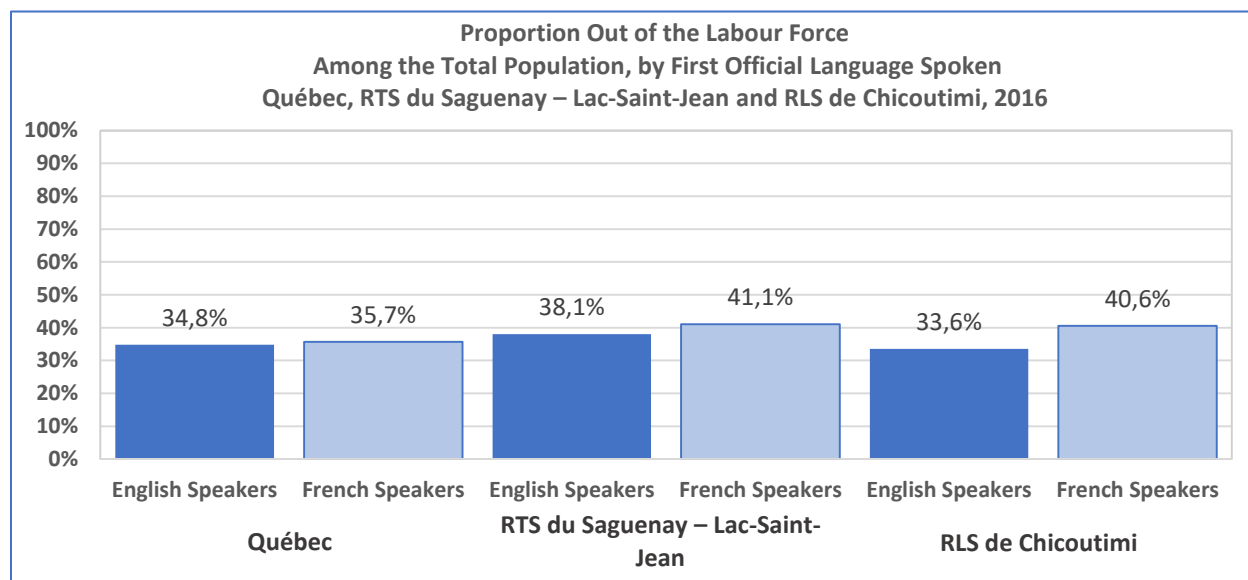

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

¹⁰ For further discussion of employment and working conditions as health determinants and the Population Health Model see J. Carter, A Community Guide to the Population Health Approach, Community Health and Social Services Network (CHSSN), www.chssn.org, March 2003. See also D. Raphael (ed.) (2009) Social Determinants of Health: Canadian Perspectives, 2nd Edition. Toronto: Canadian Scholar's Press.

Unemployed

- Across Québec in 2016, there were 54,105 English speakers who were unemployed resulting in an unemployment rate of 8.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2016, there were 75 unemployed English speakers in the RTS du Saguenay – Lac-Saint-Jean region where they experienced an unemployment rate of 7.1%. The unemployment rate of the regional English-speaking population was much lower than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was much lower than that experienced by the provincial English-speaking population.
- In RLS de Chicoutimi, we find 10 unemployed English speakers resulting in an unemployment rate of 2.4%. This is much lower than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is much lower than the unemployment rate experienced by English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Out of the labour force¹¹

- Across Québec in 2016, there were 324,790 English speakers out of the labour force in 2016. This group represents 34.8% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is similar to that found in the French-speaking majority population in Quebec aged 15 and over.

¹¹ The Statistics Canada category “[out of the labour force](#)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability. (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

- In 2016, there were 645 English speakers out of the labour force in the RTS du Saguenay – Lac-Saint-Jean region where they comprise 38.1% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that exhibited by the provincial English-speaking population.
- In RLS de Chicoutimi, we find 210 English speakers out of the labour force where they account for 33.6% of the English-speaking population. This is much lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the RTS du Saguenay – Lac-Saint-Jean region.

Appendix A – English speakers and French speakers by RSS, RTS and RLS, 2016¹²

Number and Proportion of English and French Speakers in RSS du Saguenay - Lac-Saint-Jean, by Territory, 2016				
Geography	Total Population	French Speakers	English Speakers	Proportion of English Speakers
RSS du Saguenay - Lac-Saint-Jean	268,870	266,835	1,975	0.7%
RTS du Saguenay – Lac-Saint-Jean	268,870	266,835	1,975	0.7%
RLS du Domaine-du-Roy	30,245	30,155	80	0.3%
RLS de Maria-Chapdelaine	24,390	24,350	40	0.2%
RLS de Lac-Saint-Jean-Est	50,560	50,340	205	0.4%
RLS de Jonquière	65,115	64,600	515	0.8%
RLS de Chicoutimi	76,505	75,760	710	0.9%
RLS de La Baie	22,060	21,630	425	1.9%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

¹² Baseline Data Reports are only available for those RLS territories with at least 250 English speakers. This table nonetheless lists all RLS territories in a given RSS/RTS area.

Appendix B – Baseline Data Report Series
