## Introduction

### Community Health and Social Services Network (CHSSN)

The Community Health and Social Services Network (CHSSN) is a network of more than seventy community resources, associations, foundations, public institutions and other stakeholders dedicated to improving access to health and social services for English-speaking minority communities in Quebec. CHSSN builds and strengthens health and social services networks and partnerships at the local, regional and provincial levels to address health determinants, to influence public policy and to support community and public partners in the adaptation of services.

Through the development of projects and partnerships with community and public institutions, the CHSSN aims to reduce health inequities by supporting innovative practices and the transfer of learning through population health interventions.

Innovative programs and partnerships include networking and partnership initiatives, improving access to health and social services, health promotion and public health education, and training and retention of health professionals.

### This Document

This document presents a series of tables illustrating key socio-demographic variables of visible minority populations within language groups for xyz.

The variables covered are:

- Gender
- Age structure
- Household living arrangements
- Recent mobility
- Educational attainment
- Labour force activity
- Income
- Low-income cut-off

Each table contains three blocs of information, as follows:

- Numbers of English-speaking visible minorities in each of the variable categories.
- Proportion of English-speaking visible minorities across the categories in the variable.
- Number and proportion of French-speaking populations with the total, visible-minority and non-visible-minorities groups identified.

## Methodological notes

### Geographic Regions<sup>1</sup>

For the purpose of this report, there is sufficient data for the province and for 8 of Quebec's health regions. The remaining regions are grouped into a "rest of Quebec" category. This report is presented in two formats. The complete report consists of data for Quebec, for 8 health regions and for the "rest of Quebec".<sup>2</sup> A series of individual reports presents data on each region.

### Language Concept

The language concept used in this series of tables is First Official Language Spoken (FOLS) which is derived from three census questions (knowledge of official languages, mother tongue and home language). Multiple responses are assigned equally among declared languages.

### Visible Minority Concept

The concept of visible minorities in the Canadian context was developed to support the *Employment Equity Act* which aims to "achieve equality in the workplace so that no person shall be denied employment opportunities or benefits for reasons unrelated to ability and, in the fulfilment of that goal, to correct the conditions of disadvantage in employment experienced by women, aboriginal peoples, persons with disabilities and members of visible minorities."<sup>3</sup>

The Act defines visible minorities as 'persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour.' Under this definition, regulations specify the following groups as visible minorities: Chinese, South Asians, Blacks, Arabs, West Asians, Filipinos, Southeast Asians, Latin Americans, Japanese, Koreans and other visible minority groups, such as Pacific Islanders.<sup>4</sup>

### Data Source and Reliability

**Data source** - The data in these tables is drawn from the Statistics Canada 2011 National Household Survey (NHS) which was voluntary for respondents and therefore subject to sampling error and was also subject to potentially higher non-response error than the mandatory census. The data in these tables comes from special tabulations ordered by the Community Health and Social Services Network (CHSSN).

**Data suppression** - For the purposes of confidentiality, Statistics Canada applies area suppression rules which suppresses data for geographic areas with populations below a specified size. Income distributions and related statistics are suppressed if the population in the area, excluding residents in collective dwellings, is less than 250, or if the number of private households is less than 40.

---

<sup>1</sup> During the period that this report was prepared, the health boundaries in Quebec were undergoing revision. For the purposes of this report, the boundaries in effect in 2011 are used.

<sup>2</sup> The "Rest of Quebec" consists of the regions of Gaspésie - Îles-de-la-Madeleine, Bas-Saint-Laurent, Chaudière - Appalaches, Centre-du-Québec, Abitibi - Témiscamingue, Mauricie, Saguenay - Lac-Saint-Jean, Côte-Nord and Nord-du-Québec.

<sup>3</sup> <http://laws-lois.justice.gc.ca/eng/acts/E-5.401/page-1.html#h-2>

<sup>4</sup> <http://www12.statcan.gc.ca/nhs-enm/2011/ref/guides/99-010-x/99-010-x2011009-eng.cfm>. See <http://www.statcan.gc.ca/eng/concepts/definitions/minority01a> for further details on the country groupings.

Given that cross-tabulations of small populations produce even smaller population counts which are unreliable for statistical analysis, visible minority groups which fall below the 250 count are suppressed from specific tables.

### **Definitions**

For definitions of certain NHS variables, refer to the definitions section in the appendix.

## Quebec (Province)

This first series of tables presents data for the province of Quebec and then for each region with a substantial count of visible minority groups within the English-speaking population.

### Count of Visible Minority Groups

Count of Visible Minority Groups in the English-speaking Population Selected Regions, Quebec, 2011

## Rest of Quebec

For this series of tables on the socio-demographic status of visible minority groups within language populations, tables have been produced for the regions in which there was a numerically significant number of visible minority individuals within the English-speaking populations. The remainder of the Quebec territory has been grouped into the “rest of Quebec” which consists of the regions of Gaspésie - Îles-de-la-Madeleine, Bas-Saint-Laurent, Chaudière - Appalaches, Centre-du-Québec, Abitibi - Témiscamingue, Mauricie, Saguenay - Lac-Saint-Jean, Côte-Nord and Nord-du-Québec.

Overall, this “rest of Quebec” territory includes 50,800 English speakers of whom 1,635 (3.2%) are members of visible minority groups.

## Appendix - Definitions and Notes

### Recent Mobility

Non-movers are persons who lived at the same address 5 years previously

Non-migrants are persons who have moved but live within the same municipality as they did 5 years previously.

Intraprovincial migrants are persons who moved over the past 5 years but within the same province.

Interprovincial migrants are persons who moved over the past 5 years from another province into Quebec.

External migrants are persons who moved into Quebec from another country over the past 5 years.

### Labour Force Status – Not in the Labour Force

Refers to persons who, in the week (Sunday to Saturday) prior to Census Day, were neither employed nor unemployed. It includes students, homemakers, retired workers, seasonal workers in an 'off' season who were not looking for work, and persons who could not work because of a long-term illness or disability.

### Income

The low income category includes those with less than \$20,000 in reported income combined with those who reported no income.

### Low-income Cut-off (LICO)

Income levels at which families or persons not in economic families spend 20% more than average of their before tax income on food, shelter and clothing
