## Introduction

### ***About the 2017-2018 report series***

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI). The information presented is drawn from the 2016 Census of Canada and organized by province and RTS and RLS territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Quebec's official language minority community.

### ***Baseline Data Report Series***

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region. A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix "B".

### **Determinants of Health**

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.<sup>1</sup>

### **Language Barriers**

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and impression formation which impacts the evaluation and treatment of individuals seeking health and social services.

## **Methodological Notes**

### **Data Source**

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2016 Census of Canada. The population included here are those in private householders, drawing on the long-form census which has a 25% sample of the Canadian population.

### **Linguistic definitions**

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

## Geographic Regions

The 2017-2018 Baseline Data Report consists of a series of stand-alone documents which present key data for the RTS and RLS territories in Quebec in which there are at least 250 English-speaking residents.

In 2015, as part of the re-organization of health services by the MSSS, a series of new health territories known as the RTS (réseau territorial de services) and the RLS (réseau local de service) were established.<sup>2</sup>

The RTS is the réseau territorial des services which corresponds to the territories covered by the CISSS and CIUSSS bodies that were created recently by the government.

The 25 RTS regions were based on the former RSS (région socio-sanitaire or health regions) territories with these important changes:

- The RSS Gaspésie - Îles-de-la-Madeline was divided into RTS de la Gaspésie and RTS des Îles-de-la-Madeleine.
- The RSS Montréal was divided into five RTS regions.
- Part of the former RSS Montérégie territory was assigned to the Estrie region, newly named as RTS Estrie et Centre universitaire de Sherbrooke.
- The remaining area for RSS Montérégie was divided into three RTS territories.

As part of the 2015 re-organization, the territories of the former CSSS (Centre de santé et de services sociaux) were transformed into 96 RLS territories and many were re-named.

It is useful to note that many RLS territories are identical to CLSC territories while others are comprised of multiple CLSC territories.

The 166 CLSC territories remained unchanged although some were re-named.

---

<sup>2</sup> Appendix A of this document provides tables which set out the population and hierarchy of the new health geographic areas for a given RSS and its RTS and RLS territories.

## **Demographic and Socio-economic Characteristics**

The demographic and socio-economic variables addressed in the 2017-2018 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)
- Educational attainment
- Labour force activity

## **Statistics Canada Definitions**

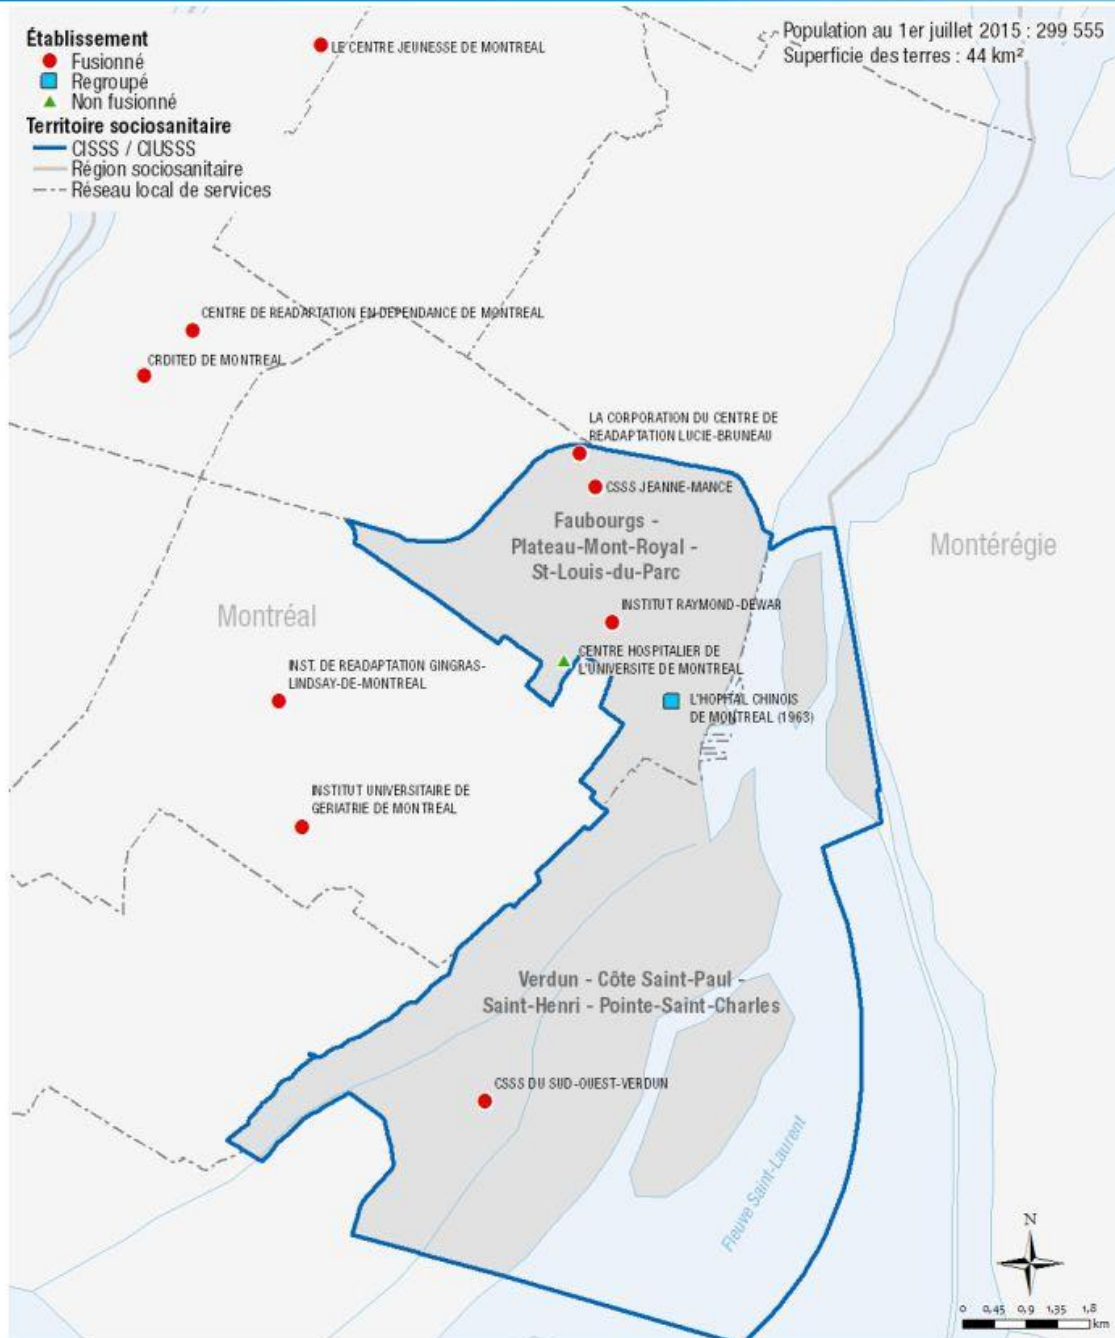

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2016 Census may also be consulted.

## Demographic Size

Quebec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.<sup>3</sup> In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

**Table 1 - Population Size**

Size of Population		Québec	RTS du Centre-Sud-de- l’Île-de-Montréal	Rest of Québec
FOLS - English speakers	number	1,097,925	77,840	1,020,085
	percentage	13.8%	26.7%	13.3%
FOLS - French speakers	number	6,795,280	209,030	6,586,250
	percentage	85.3%	71.7%	85.8%
Total population	number	7,965,450	291,630	7,673,820
	percentage	100.0%	100.0%	100.0%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

From ‘multicultural health’ to ‘knowledge translation’ – rethinking strategies to promote language access within a risk management framework. *The Journal of Specialized Translation (Jostrans)*, Issue 14, [http://www.jostrans.org/issue14/art\\_bowen.php](http://www.jostrans.org/issue14/art_bowen.php). See also, Jacobs, E, and A. Chen, L. Karliner, N. Agger-Gupta & S. Mutha. (2006). “The Need for More Research on Language Barriers in Health Care: A Proposed Research Agenda”. *The Millbank Quarterly*, Vol. 84, No. 1, pp. 111-133.

- Across Québec, there were 1,097,925 English speakers, representing 13.8% of the provincial population.
- In 2016, there were 77,840 English speakers living in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they represented 26.7% of the population. This share is much higher than the overall provincial share for English speakers.
- In the rest of Québec, we find 1,020,085 English speakers where they represented 13.3% of the population. This proportion is much lower than that represented by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal territory.

## Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires awareness of the problems that are pressing for the minority and may be overlooked in the focus on the majority, and, awareness of problems that are shared by both language groups but are being met with solutions that are not equally accessible for both.

**Table 2 - Age Structure of the Population**

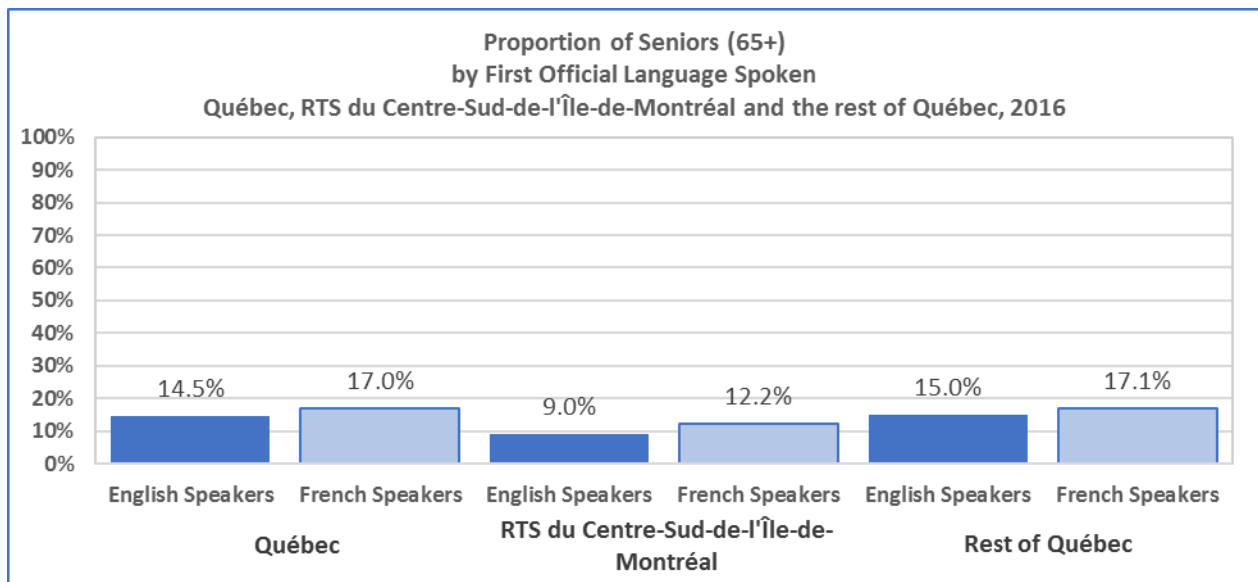

Age Structure of the Population	Québec		RTS du Centre-Sud-de-l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total - Age groups	1,097,925	6,795,280	77,840	209,030	1,020,085	6,586,250
0-14 years	165,085	1,143,060	8,400	26,085	156,685	1,116,975
15-24 years	146,460	776,310	9,810	23,905	136,650	752,405
25-44 years	320,930	1,728,440	35,705	82,190	285,225	1,646,250
45-64 years	305,775	1,995,460	16,900	51,390	288,875	1,944,070
65+ years	159,670	1,152,005	7,025	25,460	152,645	1,126,545
Total - Age groups	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
0-14 years	15.0%	16.8%	10.8%	12.5%	15.4%	17.0%
15-24 years	13.3%	11.4%	12.6%	11.4%	13.4%	11.4%
25-44 years	29.2%	25.4%	45.9%	39.3%	28.0%	25.0%
45-64 years	27.9%	29.4%	21.7%	24.6%	28.3%	29.5%
65+ years	14.5%	17.0%	9.0%	12.2%	15.0%	17.1%

*Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.*

### Children (aged 0-14)

- Across Québec, there were 165,085 English-speaking children aged 0-14, representing 15.0% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 8,400 English-speaking children aged 0-14 living in RTS du Centre-Sud-de-l'Île-de-Montréal where they account for 10.8% of the population. The proportion of children in the regional English-speaking population is lower than their proportion in the regional French-speaking majority population. This proportion is much lower than the level for English-speaking children across the province.
- In the rest of Québec, we find 156,685 English-speaking children aged 0-14 where they represent 15.4% of the population. This share is much higher than that exhibited by English-speaking children across the RTS du Centre-Sud-de-l'Île-de-Montréal region. The proportion of children in the territory's English-speaking population is lower than the share in the rest of Québec's French-speaking majority population.

### Seniors (aged 65 and over)

- Across Québec, there were 159,670 English-speaking seniors aged 65+ representing 14.5% of the English-speaking population. The proportion of seniors in the English-speaking population is lower than that found in the French-speaking majority population in Québec.
- In 2016, there were 7,025 English-speaking seniors aged 65+ living in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they accounted for 9.0% of the population. This share is much lower than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is much lower than their proportion in the French-speaking majority population.
- In the rest of Québec, we find 152,645 English-speaking seniors aged 65+ where they account for 15.0% of the population. This share is lower than that of English-speaking seniors across the RTS du Centre-Sud-de-l'Île-de-Montréal region. The proportion of seniors in the English-speaking population is much higher than the proportion in the French-speaking majority population in the rest of Québec.

## Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.<sup>4</sup> For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution lead to increases in social problems and poorer health among the population as a whole<sup>5</sup>.

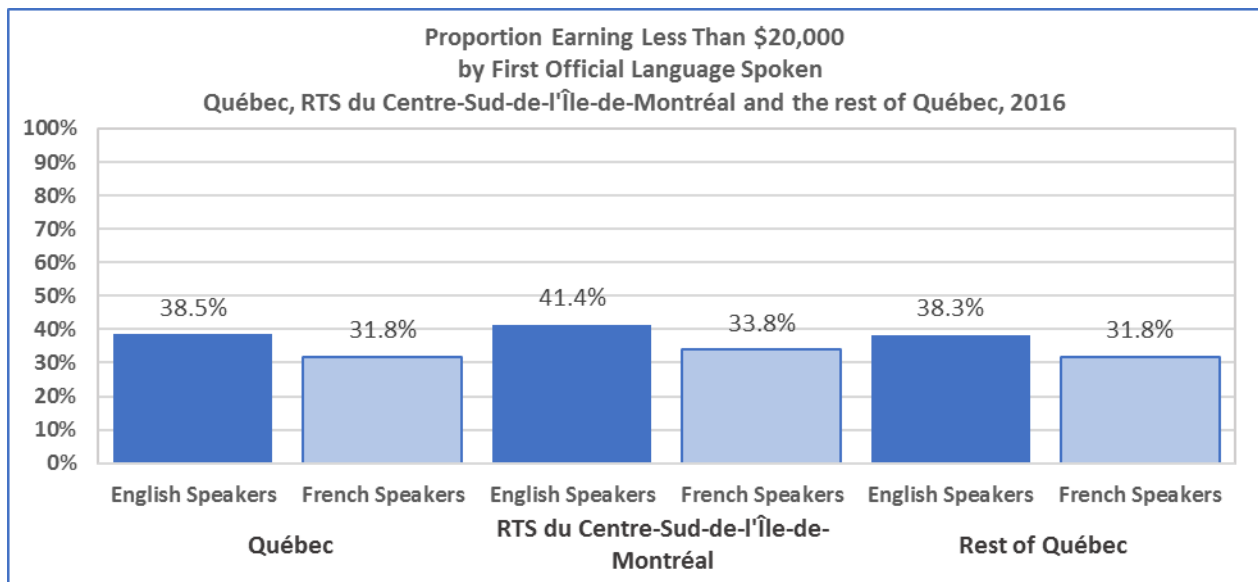

**Table 3 - Income**

Population by Income Group	Québec		RTS du Centre-Sud-de- l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total Population 15+	932,835	5,652,215	69,440	182,945	863,395	5,469,270
Less than \$20,000	359,020	1,799,170	28,720	61,885	330,300	1,737,285
\$20,000 - \$49,999	328,605	2,235,010	22,875	64,010	305,730	2,171,000
\$50,000 +	245,210	1,618,025	17,845	57,035	227,365	1,560,990
Total Population 15+	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Less than \$20,000	38.5%	31.8%	41.4%	33.8%	38.3%	31.8%
\$20,000 - \$49,999	35.2%	39.5%	32.9%	35.0%	35.4%	39.7%
\$50,000 +	26.3%	28.6%	25.7%	31.2%	26.3%	28.5%

*Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.*

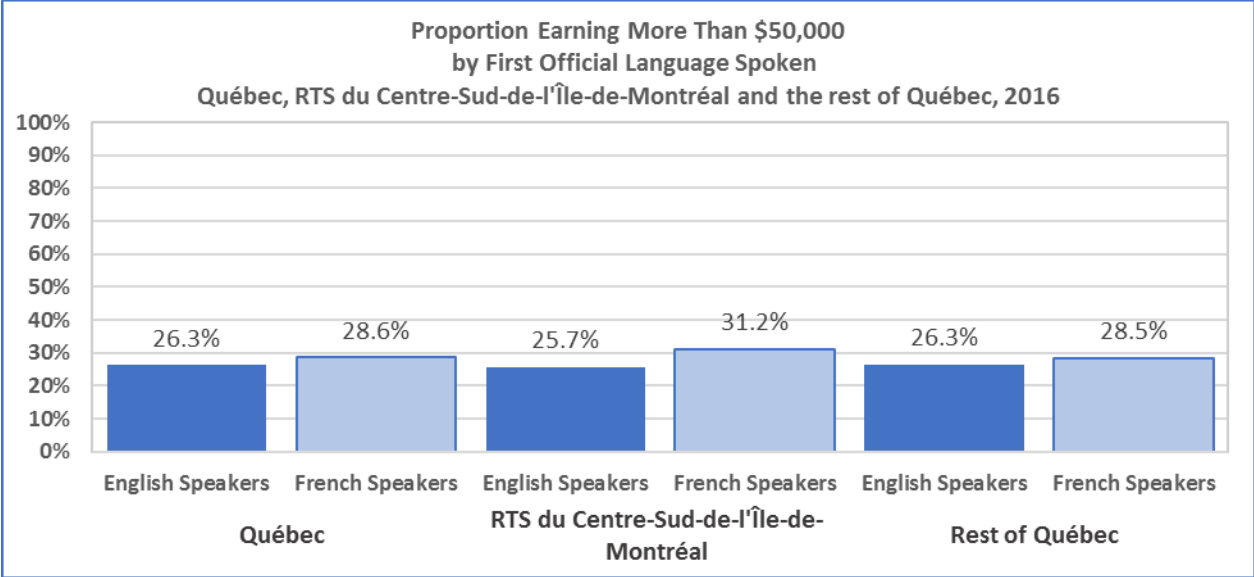

<sup>4</sup> Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> Accessed March 2014.

<sup>5</sup> *Ibid.*

### Income under \$20k

- Across Québec in 2016, there were 359,020 English speakers aged 15+ with income under \$20k. This group represents 38.5% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2016, there were 28,720 English speakers aged 15+ with income under \$20k in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they represent 41.4% of the English-speaking population aged 15 and over. This share is higher than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is much higher than the proportion in the French-speaking majority population.
- In the rest of Québec, we find 330,300 English speakers aged 15+ with income under \$20k where they account for 38.3% of the population. This share is lower than that experienced by English speakers across RTS du Centre-Sud-de-l'Île-de-Montréal. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in the rest of Québec.

**Earning \$50k and over**

- Across Québec, there were 245,210 English speakers aged 15+ with income over \$50k, who represented 26.3% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 17,845 English speakers aged 15+ with income over \$50k living in the RTS du Centre-Sud-de-l'Île-de-Montréal region, where they represented 25.7% of the population. This proportion was similar to the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is lower than the share of high earners in the French-speaking majority population in the region.
- In the rest of Québec, we find 227,365 English-speaking high earners aged 15+, where they represent 26.3% of the population. This share is similar to that experienced by English-speaking high earners across the RTS du Centre-Sud-de-l'Île-de-Montréal region. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

## Household Living Arrangements

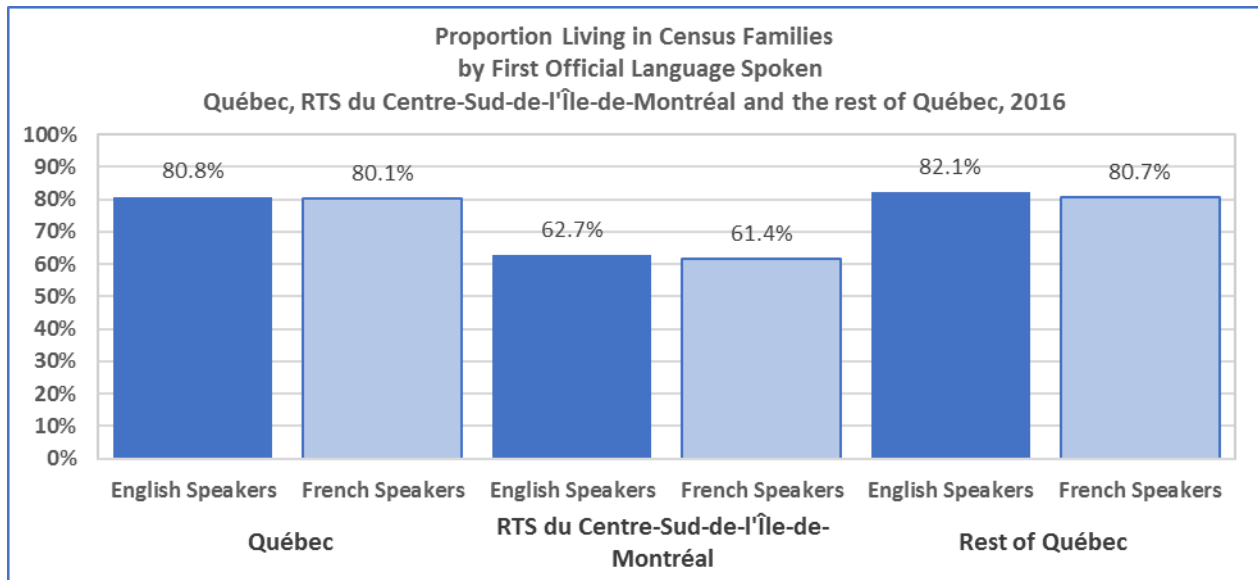

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. For example, the Quebec Social and Health Survey (1998) revealed that parents of minors living in lone parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.<sup>6</sup> Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to illness or aging.

**Table 4 - Population by Household Living Arrangements**

Population by Household Living Arrangements	Québec		RTS du Centre-Sud-de- l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total - Household living arrangements	1,097,925	6,795,280	77,840	209,030	1,020,085	6,586,250
Total persons in census family households	886,705	5,443,560	48,775	128,440	837,930	5,315,120
Persons in two-parent households	750,650	4,640,895	40,505	105,095	710,145	4,535,800
Persons in single-parent households	136,050	802,660	8,275	23,350	127,775	779,310
Total persons in non-census family households	211,215	1,351,720	29,065	80,585	182,150	1,271,135
Living with relatives	23,435	116,660	1,735	4,330	21,700	112,330

Living with non-relatives only	3.7%	3.1%	10.9%	10.0%	3.2%	2.9%
Living alone	13.4%	15.0%	24.2%	26.5%	12.6%	14.7%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

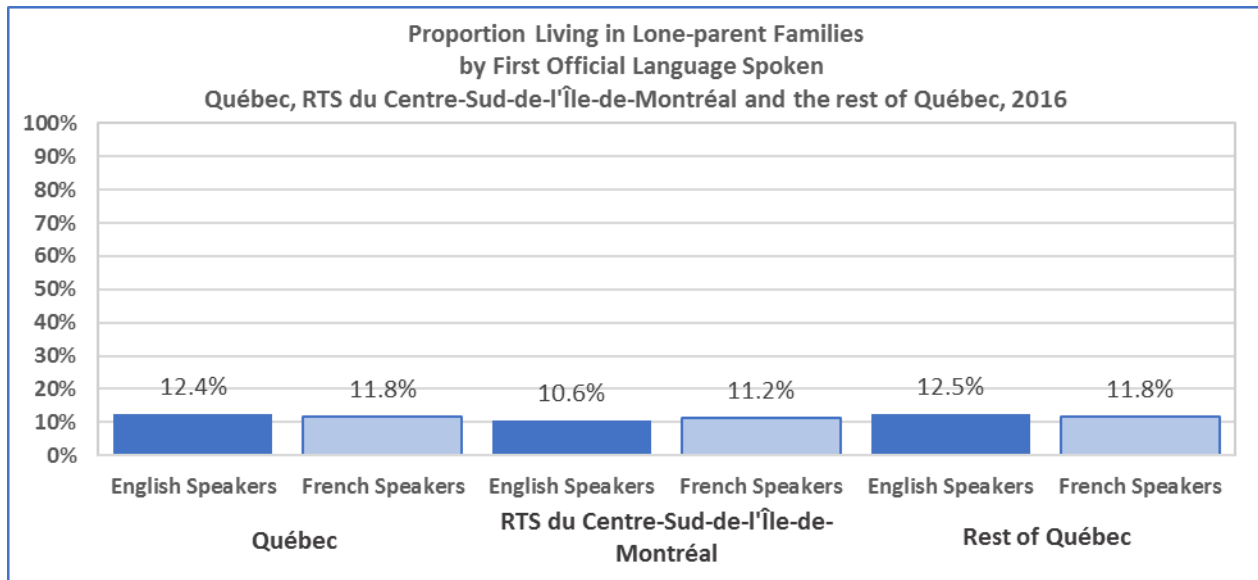

<sup>6</sup> For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." *Community Health and Social Services Network (CHSSN)*. [www.chssn.org](http://www.chssn.org)

### Living in census families<sup>7</sup>

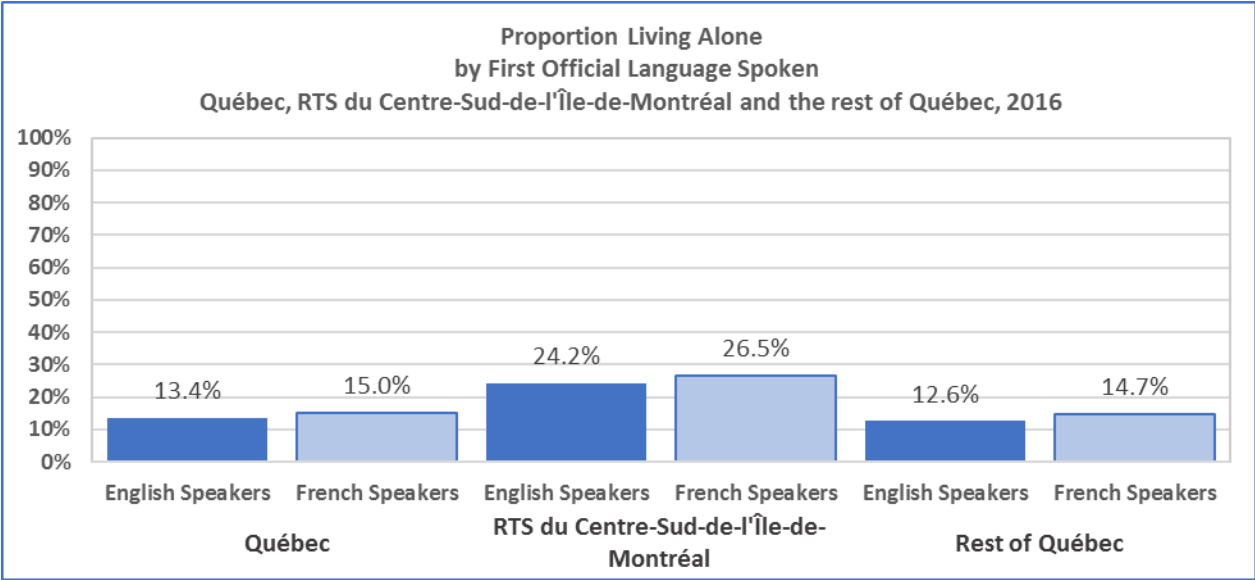

- Across Québec, there were 886,705 English speakers living in census family households. This group represents 80.8% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2016, there were 48,775 English speakers living in census family households in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they comprise 62.7% of the population. This share is much lower than that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In the rest of Québec, we find 837,930 English speakers living in census family households where they account for 82.1% of the population. This share is much higher than that accounted for by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in the rest of Québec.

<sup>7</sup> Under Statistics Canada's terminology, a census family refers "a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child. A couple may be of opposite sex or same sex. 'Children' in a census family include grandchildren living with their grandparent(s) but with no parents present." (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

### Living in lone-parent families

- Across Québec, there were 136,050 English speakers living in lone-parent families. This group represents 12.4% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Québec.
- In 2016, there were 8,275 English speakers living in lone-parent families in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 10.6% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is similar to the proportion found in the regional French-speaking majority population. The proportion is lower than that found in the provincial English-speaking population.
- In the rest of Québec, we find 127,775 English speakers living in lone-parent families where they represent 12.5% of the population. This is similar to the proportion represented by the French-speaking majority population in the rest of Québec. The proportion of English speakers living in lone-parent families in the rest of Québec English-speaking population is lower than the proportion we find for English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

**Living alone**

- Across Québec, there were 146,855 English speakers living alone. This group represents 13.4% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 18,825 English speakers living alone in the RTS du Centre-Sud-de-l'Île-de-Montréal region, where they account for 24.2% of the population. This level is much higher than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population.
- In the rest of Québec we find 128,030 English speakers living alone, where they represent 12.6% of the population. This share is much lower than that exhibited by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region. The proportion of those living alone in the territory's English-speaking population is lower than the proportion exhibited by the French-speaking majority population in the rest of Québec.

## Low-Income Cut-off

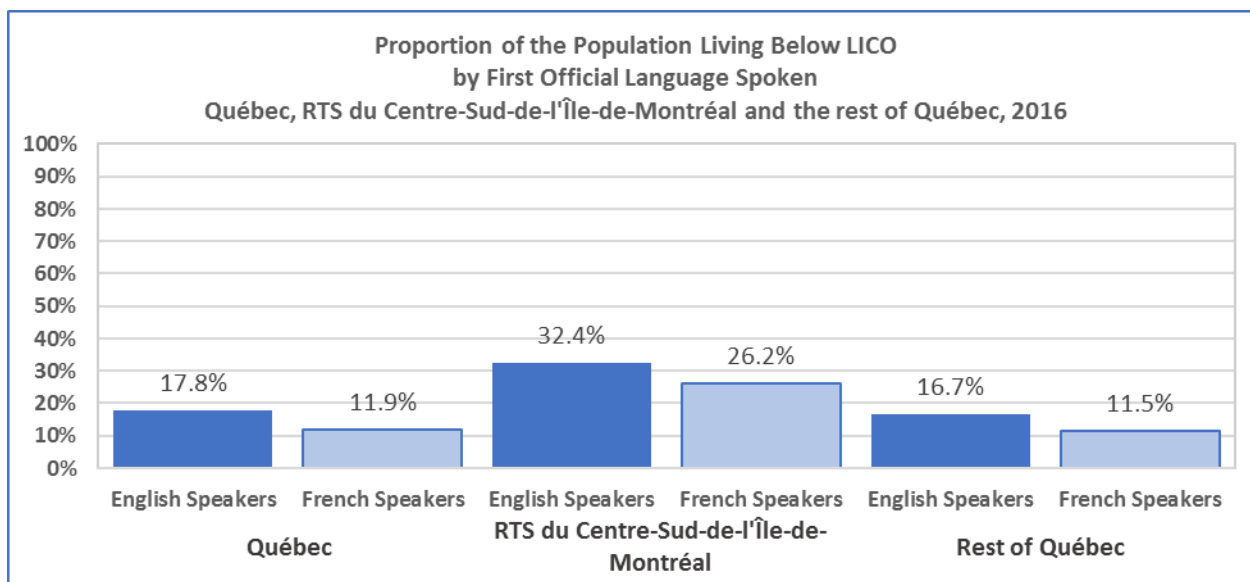

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”<sup>8</sup> The following table considers the population living below LICO by language, administrative territory and age group.

**Table 5 - Population Living Below LICO, Within Age Groups**

Population Living Below the Low-Income Cut-off (LICO), Across Age Groups	Québec		RTS du Centre-Sud-de- l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total - Age groups	195,300	811,110	25,200	54,765	170,100	756,345
0-14 years	25,480	125,400	2,565	6,200	22,915	119,200

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.

<sup>8</sup> See “Low income cut-offs” (dated 2015-11-2) <https://www.statcan.gc.ca/pub/75f0002m/2012002/lico-sfr-eng.htm> for explanation of how LICOs are calculated.

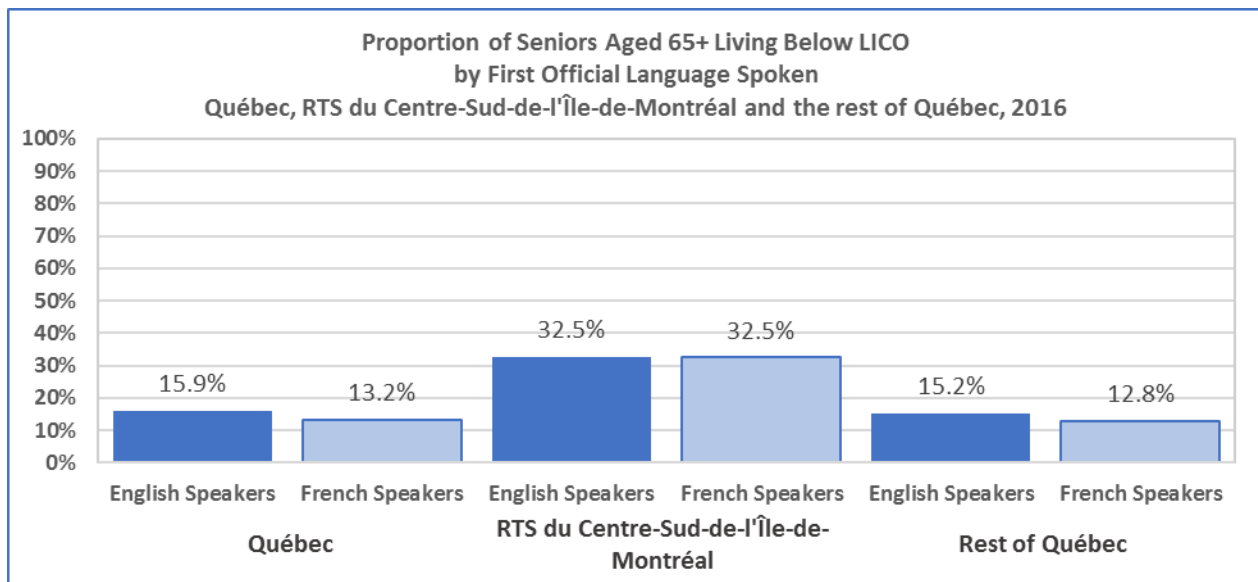

### Population living below the low-income cut-off (LICO)

- Across Québec, there were 195,300 English speakers living below LICO. This group accounts for 17.8% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Québec.
- In 2016, there were 25,200 English speakers living below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region, where they represent 32.4% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in RTS du Centre-Sud-de-l'Île-de-Montréal is much higher than the proportion for Québec's English speakers in general.
- In the rest of Québec, we find 170,100 English speakers living below LICO, where they represent 16.7% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much lower than the proportion for English speakers across RTS du Centre-Sud-de-l'Île-de-Montréal.

**Children (0-14) Living below the low-income cut-off (LICO)**

- Across Québec, there were 25,480 English-speaking children living below LICO. This group represents 15.4% of the population of children. The proportion of English-speaking children living below LICO is much higher than the proportion found for children in the French-speaking majority population in Quebec.
- In 2016, there were 2,565 English-speaking children living below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 30.5% of the children in the regional English-speaking population. The proportion of children living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority children's population. This proportion is much higher than that displayed by English-speaking children across the province.
- In the rest of Québec, we find 22,915 English-speaking children living below LICO where they represent 14.6% of the English-speaking children's population. This proportion is much higher than the proportion experienced by children in the French-speaking majority in the same territory. The proportion of children living below LICO in the territory's English-speaking population is much lower than the proportion experienced by English-speaking children across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

### Seniors (65+) Living below the low-income cut-off (LICO)

- Across Québec, there were 25,445 English-speaking seniors living below LICO. This group represents 15.9% of the English-speaking senior population. The proportion of English-speaking seniors living below LICO is much higher than the proportion of seniors living below LICO in the French-speaking majority population in Québec.
- In 2016, there were 2,285 English-speaking seniors living below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 32.5% of the regional English-speaking senior population. The proportion of those seniors living below LICO in the regional English-speaking senior population is similar to the proportion in the regional French-speaking majority senior population. This proportion is much higher than that experienced by English-speaking seniors across the province.
- In the rest of Québec, we find 23,160 English-speaking seniors living below LICO where they represent 15.2% of the English-speaking senior population. This is higher than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much lower than the level displayed by English-speaking seniors across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

**Table 6 - Population Living Below LICO, by Household Living Arrangements**

Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements	Québec		RTS du Centre-Sud-de-l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total - Household living arrangements	195,300	811,110	25,200	54,765	170,100	756,345

Living with non-relatives only	63.3%	50.2%	65.4%	57.9%	62.8%	49.3%
Living alone	39.1%	31.0%	41.7%	38.4%	38.7%	30.6%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

**Persons in Census Family Households living below the low-income cut-off (LICO)**

- Across Québec, there were 107,000 English-speaking persons in census family households living below LICO. This group represents 12.1% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.

- In 2016, there were 11,220 English-speaking persons in census family households living below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region, where they represent 23.0% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is much higher than that found in the provincial English-speaking population.
- In the rest of Québec, we find 95,780 English-speaking persons in census family households living below LICO, where they account for 11.4% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is much lower than the proportion found in the English-speaking population of the RTS du Centre-Sud-de-l'Île-de-Montréal region.

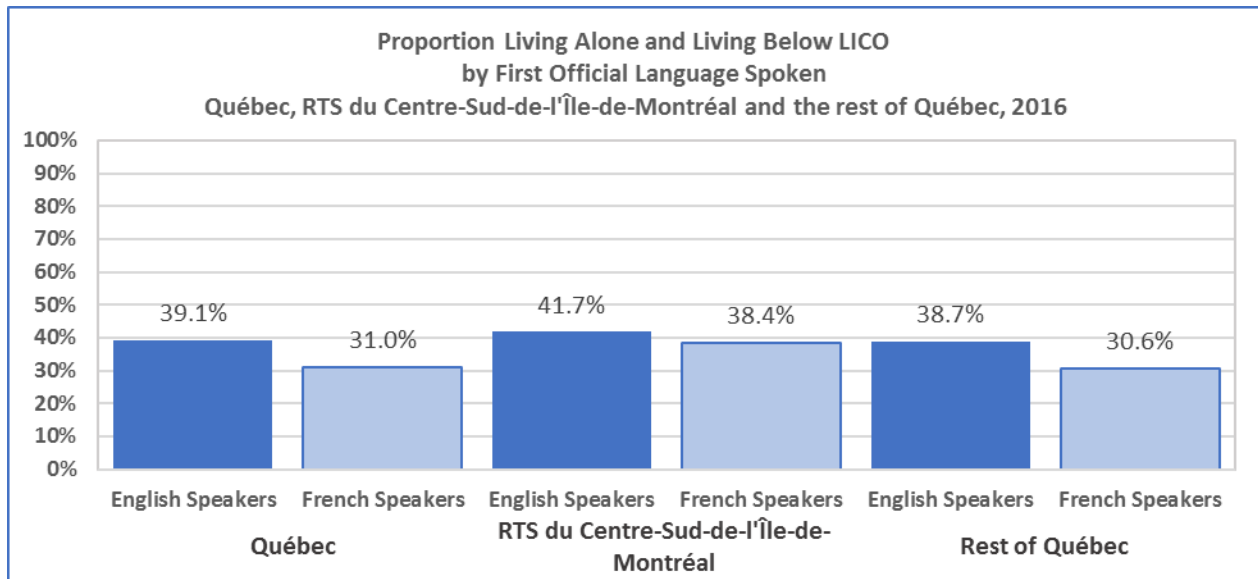

**Persons in Lone-Parent Families Living below the low-income cut-off (LICO)**

- Across Québec, there were 34,755 English-speaking persons in lone-parent families living below LICO. This group represents 25.5% of the English-speaking population living in lone-parent families. The proportion of English-speaking persons in lone-parent families living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living in lone parent families.
- In 2016, there were 3,655 English-speaking persons in lone-parent families living below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 44.2% of the regional English-speaking lone-parent family population. The proportion of persons in lone-parent families living below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. The level

for the English-speaking regional population is much higher than that found in the provincial English-speaking population.

- In the rest of Québec, we find 31,100 English-speaking persons in lone-parent families living below LICO where they account for 24.3% of the English-speaking lone-parent family population. This is much higher than the proportion experienced by the French-speaking majority lone-parent family population in the same territory. The proportion of persons in lone-parent families living below LICO in the territory's English-speaking population is much lower than the proportion experienced by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

### Persons living alone and living below the low-income cut-off (LICO)

- Across Québec, there were 57,435 English-speaking persons living alone and below LICO. This group represents 39.1% of the English-speaking population living alone. The proportion of English speaking persons living alone and below LICO is much higher than that found in the French-speaking majority population in Quebec living alone.
- In 2016, there were 7,855 English-speaking persons living alone and below LICO in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 41.7% of the regional English-speaking population living alone. The proportion of those persons living alone and below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 49,580 English-speaking persons living alone and below LICO where they represent 38.7% of the English-speaking population living alone. This is much higher than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is lower than the proportion experienced by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

## Highest Educational Attainment

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members<sup>9</sup>.

**Table 7 - Highest Educational Certification, for Selected Age Groups**

Total Population by Highest Educational Certification		Québec		RTS du Centre-Sud-de-l'Île-de-Montréal		Rest of Québec	
		English	French	English	French	English	French
Total	Total	932,840	5,652,215	69,440	182,945	863,400	5,469,270

**Population aged 15+, high school diploma or less**

- Across Québec, there were 380,050 English speakers aged 15 and over with a high school diploma or less. This group accounts for 40.7% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Québec.
- In 2016, there were 21,140 English speakers aged 15 and over with a high school diploma or less in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 30.4% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is much lower than that exhibited by English speakers across the province.
- In the rest of Québec, we find 358,910 English speakers aged 15 and over with a high school diploma or less where they represent 41.6% of the English-speaking population aged 15 and over. This level is similar to the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is much higher than the proportion exhibited by the English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

**Population 25-44, high school diploma or less**

- Across Québec, there were 84,680 English speakers aged 25-44 with a high school diploma or less. This group represents 26.4% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2016, there were 6,230 English speakers aged 25-44 with a high school diploma or less in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 17.4% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population in that age group. This proportion is much lower than that exhibited by English speakers across the province in the same age cohort.
- In the rest of Québec, we find 78,450 English speakers aged 25-44 with a high school diploma or less where they comprise 27.5% of the English-speaking 25-44 cohort. This is higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

### Population 45-64, high school diploma or less

- In Québec in 2016, there were 116,390 English-speaking aged 45-64 with a high school diploma or less. This group represents 38.1% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 5,755 English speakers aged 45-64 with a high school diploma or less in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 34.1% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the province's English speakers.
- In the rest of Québec, we find 110,635 English speakers aged 45-64 with a high school diploma or less where they comprise 38.3% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

### Population aged 15+, university degree or higher

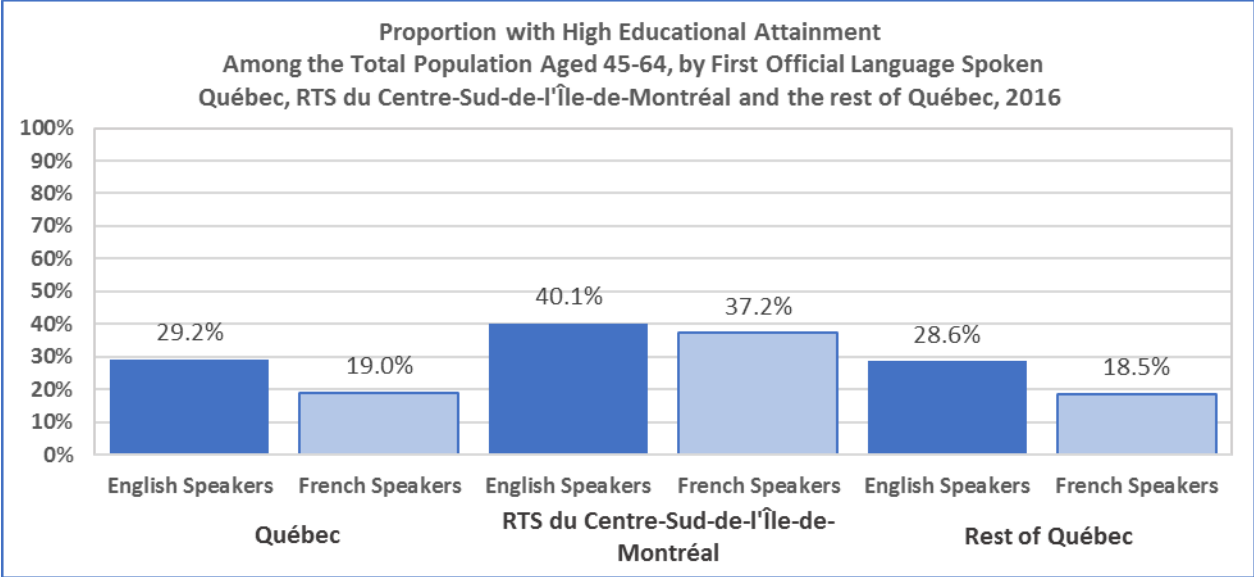

- In Québec in 2016, there were 275,800 English-speaking aged 15 and over with a university degree or higher. This group represents 29.6% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 32,555 English speakers aged 15 and over with a university degree or higher in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they account for 46.9% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 243,245 English speakers aged 15 and over with a university degree or higher where they represent 28.2% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

**Population 25-44, university degree or higher**

- In Québec in 2016, there were 136,960 English speakers aged 25-44 with a university degree or higher. This group accounts for 42.7% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 21,860 English speakers aged 25-44 with a university degree or higher in the RTS du Centre-Sud-de-l'Île-de-Montréal where they represent 61.2% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 115,100 English speakers aged 25-44 with a university degree or higher where they comprise 40.4% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

**Population 45-64, university degree or higher**

- In Québec in 2016, there were 89,255 English speakers aged 45-64 with a university degree or higher. This group represents 29.2% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 6,770 English speakers aged 45-64 with a university degree or higher in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they represent 40.1% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 82,485 English speakers aged 45-64 with a university degree or higher where they comprise 28.6% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

## Labour Force Activity

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

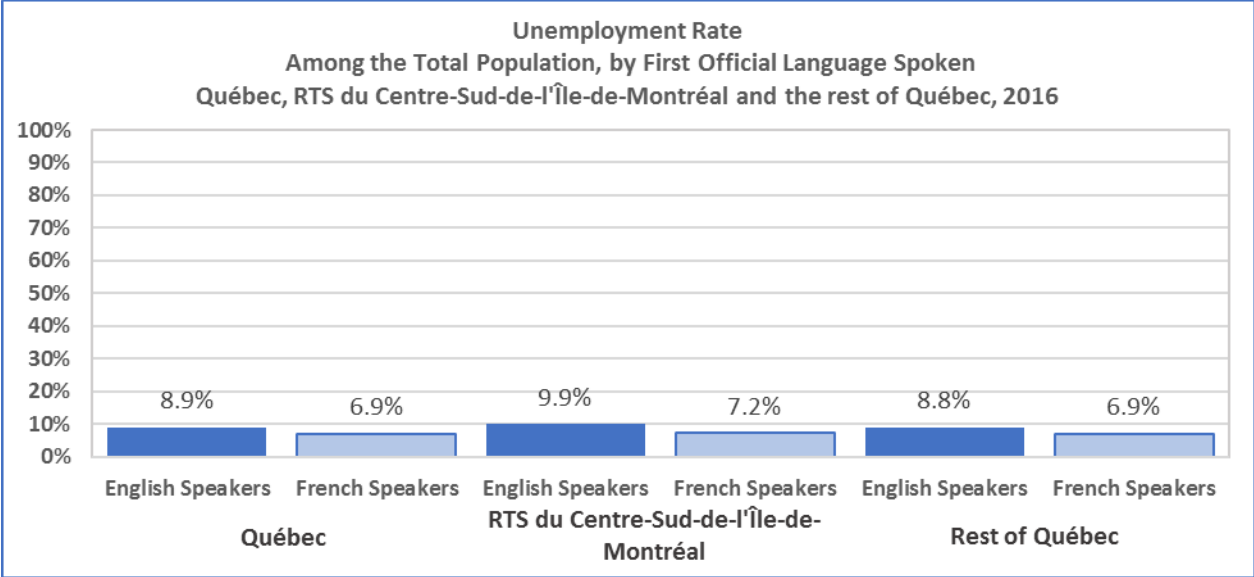

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.<sup>10</sup>

**Table 8 - Labour Force Activity**

Total Population by Labour Force Activity	Québec		RTS du Centre-Sud-de- l'Île-de-Montréal		Rest of Québec	
	English	French	English	French	English	French
Total - Labour force activity	932,840	5,652,215	69,440	182,945	863,400	5,469,270
In the labour force	608,050	3,636,980	49,200	129,120	558,850	3,507,860
Employed	553,945	3,386,575	44,325	119,835	509,620	3,266,740
Unemployed	54,105	250,410	4,875	9,280	49,230	241,130
Out of the labour force	324,790	2,015,230	20,240	53,825	304,550	1,961,405
Total - Labour force activity	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
In the labour force	65.2%	64.3%	70.9%	70.6%	64.7%	64.1%
Employed	91.1%	93.1%	90.1%	92.8%	91.2%	93.1%
Unemployed	8.9%	6.9%	9.9%	7.2%	8.8%	6.9%
Out of the labour force	34.8%	35.7%	29.1%	29.4%	35.3%	35.9%

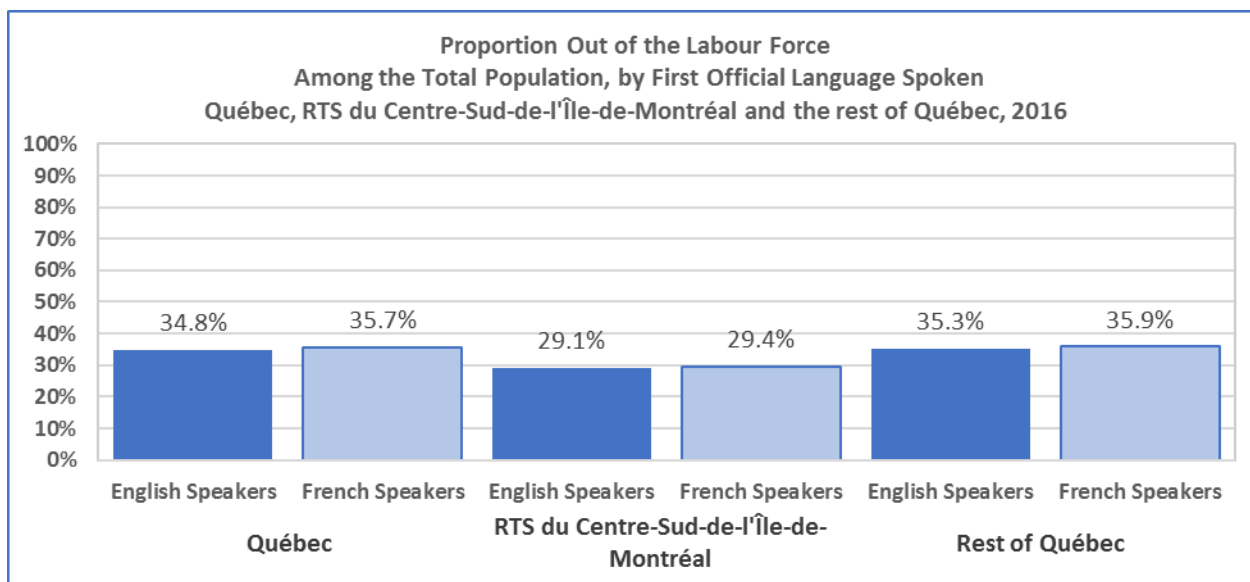

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

<sup>10</sup> For further discussion of employment and working conditions as health determinants and the Population Health Model see J. Carter, A Community Guide to the Population Health Approach, Community Health and Social Services Network (CHSSN), [www.chssn.org](http://www.chssn.org), March 2003. See also D. Raphael (ed.) (2009) Social Determinants of Health: Canadian Perspectives, 2<sup>nd</sup> Edition. Toronto: Canadian Scholar's Press.

**Unemployed**

- Across Québec in 2016, there were 54,105 English speakers who were unemployed resulting in an unemployment rate of 8.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2016, there were 4,875 unemployed English speakers in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they experienced an unemployment rate of 9.9%. The unemployment rate of the regional English-speaking population was much higher than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was higher than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 49,230 unemployed English speakers resulting in an unemployment rate of 8.8%. This is much higher than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is lower than the unemployment rate experienced by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

### Out of the labour force<sup>11</sup>

- Across Québec in 2016, there were 324,790 English speakers out of the labour force in 2016. This group represents 34.8% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is similar to that found in the French-speaking majority population in Quebec aged 15 and over.
- In 2016, there were 20,240 English speakers out of the labour force in the RTS du Centre-Sud-de-l'Île-de-Montréal region where they comprise 29.1% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the provincial English-speaking population.
- In the rest of Québec, we find 304,550 English speakers out of the labour force where they account for 35.3% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the RTS du Centre-Sud-de-l'Île-de-Montréal region.

<sup>11</sup> The Statistics Canada category “[out of the labour force](#)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability. ## Appendix A – English speakers and French speakers by RSS, RTS and RLS, 2016<sup>12</sup>

Number and Proportion of English and French Speakers in RSS de Montréal, by Territory, 2016				
Geography	Total Population	French Speakers	English Speakers	Proportion of English Speakers
RSS de Montréal	1,895,000	1,229,055	622,165	32.8%
RTS de l'Ouest-de-l'Île-de-Montréal	349,255	148,085	194,935	55.8%
RLS de Pierrefonds - Lac Saint-Louis	213,015	74,795	134,665	63.2%
RLS de Dorval - Lachine - Lasalle	136,245	73,285	60,270	44.2%
RTS du Centre-Ouest-de-l'Île-de-Montréal	337,975	142,460	185,920	55.0%
RLS de Côte-Saint-Luc - NDG - Montréal-Ouest	120,010	42,360	75,300	62.7%
RLS de Côte-des-Neiges - Métro - Parc-Extension	217,970	100,100	110,620	50.8%
RTS du Centre-Sud-de-l'Île-de-Montréal	291,630	209,030	77,840	26.7%
RLS de Verdun - Côte St-Paul - St-Henri - Pointe-St-Charles	149,925	101,655	45,855	30.6%
RLS des Faubourgs - Plateau-Mont-Royal - St-Louis-du-Parc	141,700	107,375	31,985	22.6%
RTS du Nord-de-l'Île-de-Montréal	415,685	314,375	88,895	21.4%
RLS du Nord de l'Île - Saint-Laurent	147,850	85,380	55,625	37.6%
RLS d'Ahuntsic - Montréal-Nord	159,870	135,330	20,800	13.0%
RLS de la Petite Patrie - Villeray	107,960	93,665	12,470	11.6%
RTS de l'Est-de-l'Île-de-Montréal	500,445	415,110	74,575	14.9%
RLS de Saint-Léonard - Saint-Michel	132,990	96,435	30,515	22.9%
RLS de Rivière-des-Prairies - Anjou - Montréal-Est	192,835	161,995	28,075	14.6%
RLS de Hochelaga - Mercier-Ouest - Rosemont	174,620	156,680	15,985	9.2%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

<sup>12</sup> Baseline Data Reports are only available for those RLS territories with at least 250 English speakers. This table nonetheless lists all RLS territories in a given RSS/RTS area.
