

PARENT-TEACHER MEETING CHECKLIST FOR MATH

Check off the questions you'd like to ask the teacher about how your child is doing in math.

In class Participating

How does my child measure success?

How does my kid respond when math concept is difficult to grasp?

How does my child prefer to work during math class? With or without an adult? Alone or with a buddy?

What does my kid do when faced with a challenge in math class? Does my child seek assistance?

In class Learning

What tactics help my child in math class? How can we apply these techniques at home?

Could you give me an example of a math concept that my youngster has mastered?

Can you give me an example of a math concept that my child has difficulty with?

Is homework handed in on time? Can I look at my child's in class math work?

Helping with Homework

What questions may I ask to clarify a math concept when my child is struggling at home?

What resources are there to help with math homework?

How can I assist my child in becoming more independent when it's homework time?

What home math tools should I have at my child's disposal?
